

## Powerslide

The year is 2020. After an environmental holocaust of devastating proportions, the population hovers slightly above the zero mark. The rich have fled to the underground, where they've formed corporate enclaves. Above ground, the desolate cities and desert wastelands are inhabited by a feral population of freaks and survivors. With 98 percent of the population dead, there are a lot of cars around just waiting to get driven into the ground. The ferals started the Powersliding competition, the corporates banned it.

It's dangerous, it's illegal, it kicks butt.

Powerslide is extreme off-road racing.

This demo version includes a single short track, four cars, 12 characters, and three difficulty levels, ranging from novice to expert.

### System Requirements:

P166 MMX

16MB RAM

Windows 9x (DirectX 5.0)

2MB SVGA Video Card (Optional 3D Support)

DirectX-Compatible Sound Card
