HARDWARE REQUIREMENTS

486 66MHz or higher with VESA compatible driver, 8Mb RAM, and 25Mb hard disk space.

Recommended setup: Pentium, quad-speed CD-ROM drive, VESA compatible driver, SVGA video card & monitor.

Supported: Soundblaster and 100% compatibles, AWE32, WaveBlaster, AdLib, Pro Audio Spectrum, Roland MT32, General MIDI.

This demo's high resolution graphics require both a VESA compatible SVGA video card and VESA Super VGA BIOS Extension installed before you start the game. VESA stands for Video Electronics Standards Association. This standard allows the graphics to be displayed on any video card that is VESA compatible without the need for the game's programmers to know precisely how each individual card works.

If, when attempting to run the demo, you get an error message, your video card probably needs a VESA driver loaded prior to playing. Consult the documentation and software that came with your video card on the loading of the driver, or contact your video card manufacturer.

RUNNING THE DEMO

The Syndicate Wars Demo CD will not run in native Windows 95 mode. It must be run from MS-DOS.

Insert the CD-ROM into your CD-ROM drive and select that drive by typing D: (where D is the drive letter identifying your CD-ROM).

To install the demo, type INSTALL and press [ENTER].

A directory will be created on your C: drive called SWARS.

To play the game, type PLAY and press [ENTER].

UNINSTALLATION

To uninstall the demo cd, simply delete the directory `c:\swars` and its contents. You may wish to refer to your DOS manual to find out the most efficient way of doing this.
