Charting is not installed

You requested help on Charting, however you did not install either Charting or the Charting Help file when you installed Word Pro.

If you want to use Charting or Charting Help, you can install it from your original Word Pro disks or CD ROM.

If you are using the Expert, the Expert determined that the best way to complete the task you requested is by using Charting. However, there may be other ways to do what you want. Check the list of other options in the Expert bar to see if you can use one of them.
