

What's Sierra's next HOT new game?

How about...

- Multiplane scrolling backgrounds that'll knock your eyes out
- All-digital speech, of course. Plus, all-digital music. Even all-digital ambience and sound effects
No more MIDI problems...just great sound.
- Tens of thousands of cels of great hand-drawn animation
- Hundreds of backgrounds like you've never seen before
- A great story with the humor of Al Lowe to keep you laughing
- Dozens of fresh, interesting, (even weird?) characters
- Explore worlds within worlds: five distinctive nested planets
- Puzzles to challenge even the most experienced player, but...
- Free on-line hintbook ensures even novice players will never get stuck
- Music from three-time Academy Award-winning composer Michel Legrand
- A beautiful introduction movie using the latest technology in Silicon Graphics, Alias software, motion syncing, plus thousands of hand-painted cels and backgrounds
- An all-new easy-to-use interface with all these great new features, plus more:
 - two 3-D inventories: one traditional, one for your shape-shifting sidekick
 - rewind button reviews one-time-only animation you may have missed
 - Teleprompter screen displays dialogue you may have missed
 - Save, Restore at any time, plus Auto-Save on exit
 - built-in digital mixer adjusts volume of dialogue, music and sound effects
 - adjustable timer keeps you from getting too many free hints, too fast

Give up? It's "TORIN'S PASSAGE"

Coming this Fall from Sierra!

Check the library for screen shots.
