**Tip**

- ▶ To temporarily disable AutoPlay, press the **SHIFT** key when inserting an audio CD.
- ▶ To reenable AutoPlay, repeat steps 1–4.

A Play List specifies which tracks of a CD to play and in which order. A Play List is useful if there are several songs on a CD that you like, but a few that you don't. Your Play List can specify that only the songs you like are played.

Click [Help Topics](#) to return to the list of topics.

Shows which drive is currently selected.

If you have more than one CD-ROM drive, you can change drives by clicking the down arrow and then clicking the drive from the list.

Provides a space for you to type the name of the artist whose CD is currently in the CD-ROM drive.

Provides a space for you to type the title of the CD currently in the CD-ROM drive.

Shows the order in which tracks will be played. To remove a track from the Play List, click it, and then click Remove.

To play tracks in a different order, click Clear All, and then move tracks from the Available Tracks box to the Play List. You can move the tracks by using the buttons in the dialog box or by dragging them.

Adds the selected track to the Play List.

Removes the selected track from the Play List.

Removes all tracks from the Play List. You can then add tracks in the order you want them to play.

Returns the Play List to the original track order on the CD. The Play List will be the same as the Available Tracks list.

Lists the tracks on the CD currently in the CD-ROM drive. To change the order in which tracks play, select tracks from this list and move them to the Play List.

Provides a space for you to type the name of the track. After you type the name and click Set Name, this track appears in the Available Tracks box and the Play List.

Stores the title you typed in the Tracks box. The title will appear in the Available Tracks box and the Play List.

Specifies that the current CD stops playing when you close CD Player.
