HP 3000
Business Computer Systems

HEWLETT PACKARD

HP 3000 Overview

We've spent two decades shaping the HP 3000 family of multiuser computer systems to meet our customers' complex and changing business needs. Today's HP 3000 Business Systems have the sophistication and reliability to handle the computing requirements of global enterprises – yet they're easy enough for even the smallest businesses to manage.

The HP 3000's advantages include:

- Access to the solutions and development tools you need to run your business efficiently and cost-effectively.
- Performance to master today's most complex commercial computing requirements–and flexible growth to meet tomorrow's.
- Comprehensive system availability and data integrity features for maximum uptime and 100 percent accurate information.
- Easy, cost-effective operation of both distributed and centralized systems.
- Connectivity with over 30 computer families for transparent data access–plus the tools you need to turn data from different sources into integrated information.
- The best value–today and tomorrow.
