

## Network Management Seminar Technical Data

### Course Number

HP 50749S

HP Educational Services: Your Key to Higher Productivity

### Course Overview

This seminar provides intensive coverage of network management topics and standards, and it allows students to become more knowledgeable about network management and its impact on their networks. In addition to learning about basic network management components and terminology, students will see demonstrations of the HP OpenView network management applications.

### Course Features

- | Understand what network management is and why it is needed
- | Learn about the available network management tools and services and why a company might want to install a network
- | Understand network life cycles
- | Learn open system interconnection (OSI) network management definitions
- | Understand the role of network management vendors
- | Learn about future trends in network management

### Specifications

**Course Length:** 1 day

**Audience:** Network managers, telecommunications managers, and others interested in obtaining information about management tools for effective network communications

**Prerequisites:** Basic understanding of data communications and networks

---

**Delivery Method:** Classroom, onsite

**Format:** This seminar includes lectures and classroom discussions. Students will perform group exercises and view a demonstration of an HP OpenView network management application.
