# HP9000 Series 700*i*
Model 742*i*

VMEbus Computer Systems

I f the challenge you're facing demands a board-level product with an industry standard OS;

If it requires flexibility, durability, and superior I/O capability;

If it must deliver a working solution today and adapt to the growing and changing needs of tomorrow;

Then you need the HP9000 742*i*.

The 742*i* is a VMEbus board-level computer based on HP s top-performing PA-RISC 7100 technology. It runs the HP-UX, a standards-based UNIX* operating system tuned for the PA-RISC architecture.

HP-UX 9.01 is the latest version of the HP-UX operating system for HP 9000 Series 700 workstations. HP-UX is HP's implementation of the UNIX operating system, and is highly optimized for use on the HP Precision Architecture (PA) RISC hardware architecture on the Series 700.
