

Register PowerBar

The Shareware concept

Shareware is a distribution method used to allow a pre-purchase evaluation of a software product (PowerBar for Windows in this case). Shareware is not free and after the initial evaluation period the software must be registered to obtain a software licence or removed from the evaluation machine. Shareware represents an opportunity to "try before you buy".

Why you should Register

Development of software is a time-consuming (although enjoyable) business. Registration fees support the development process as well as allowing upgrades, access to technical support and notification of enhancements. In addition a version of PowerBar will be provided that does not have the "Register" dialogs.

How to Register

Choose the registration method that is preferred by you from the available options below (if you have no preference, we would prefer a credit card):

[Registration using a Credit Card](#)

[Register by Cheque](#)

[Register by Post](#)

What will happen when you Register

When you register your copy of PowerBar you will receive the following:

1. A software licence to continue to use the product
2. Advance personal notifications of upgrade
3. Voice / fax contact information for technical support
4. A diskette containing a version of PowerBar for Windows that does not have the "Register" sections and personalised with the information sent with your registration form.
5. Entitlement to 1 free upgrade of the PowerBar program.
