

Disappearing User Setup
Greg McCall, Butler, PA, USA

How can I keep from destroying my link setup info when NAUTILUS installs its upgrades?

N:

On occasion we do make enhancements to the NAUTILUS Startup -- as you undoubtedly experienced upon loading this disc. As a result, you were prompted online to update your files. In order to retain your link setup info be sure to click the "Do Upgrade" button from the upgrade screen before allowing the upgrade to install the new files. If you exit the upgrade screen and run setup from the disc instead of allowing the Upgrade book to do this, NAUTILUS is unable to save your previous settings.
