

## Special characters

Special chracters is written either with the code, or as `&#ascii;` where `ascii` is the `ascii` code for the character. Sometimes the `ascii` variant isn't usable, so use it only when needed.

character	ASCII	tag
"	34	<code>&amp;quot;</code>
&	38	<code>&amp;amp;</code>
<	60	<code>&amp;lt;</code>
>	62	<code>&amp;gt;</code>
®	168	<code>&amp;reg;</code>
