

Welcome to Totally Hip's WebPainter™ Live Object for OpenDoc Beta 4.0

READ ME FOR TOTALLY HIP WEBPAINTER live Object FOR OPENDOC Beta 4.0
January 29th, 1996

NOTE: Previous users of WebPainter for OpenDoc must remove existing WebPainter Editors and Stationery to utilize WebPainter Live Object Beta 4.0.

Welcome to the latest technology initiative from Totally Hip, the first bitmap and animation editor for OpenDoc! This is a beta version, which takes its designed feature set and interface more or less directly from the application version of WebPainter. Development and feature set refinement are still in progress -- while this version includes basic painting functionality, some features such as Undo are not yet implemented. Completed design work has not yet been done to WebPainter for the OpenDoc environment.

Nevertheless, we feel it to be functional and generally stable editing a standalone document or embedded in a container such as Digital Harbor's WAV word processor, so we are making it publicly available to invite your feedback and design input. Specifically, we'd like to hear exactly how you want to use the OpenDoc version of WebPainter, and how the design needs to be changed or what capabilities we need to add to make it a valuable solution to you. On the other hand, if it is useful to you as it is, we'd like to hear that too and what you're using it for.

To submit bugs that you may encounter in WebPainter for OpenDoc Beta 4.0, or a wish list of new features that you would like us to include in future versions of WebPainter, please send e-mail to: webpainter@totallyhip.com.

Please be as specific as possible about the version of WebPainter you are using, the versions of other software that you are using WebPainter with, as well as your hardware information and System Software you're using. Be sure to include a test case for the problem, including a URL if possible.

Contents of Installer:

WebPainter for OpenDoc folder:

- this Read Me
- End-User License Agreement
- WebPainter stationery
- WebPainter OpenDoc editor

The editor needs to be placed in your OpenDoc Editors folder, which will be found inside your System Folder after you have installed OpenDoc, before you can open WebPainter for OpenDoc stationery.

WebPainter Registration and License Agreement:

After a successful installation, you should read the terms in conditions of the End-User License Agreement before you use WebPainter.

If you have any questions or concerns, please e-mail us at: webpainter@totallyhip.com. Or refer to our site, <http://www.totallyhip.com>, for the latest product releases, updates, information, sample animations, and all sorts of other great stuff.

Enjoy WebPainter for OpenDoc!
