

Cetus StormWindows for Windows 95 Documentation

About Cetus StormWindows

Cetus StormWindows [TM] is Copyright 1994-1997 by Cetus Software Inc. All Rights are Reserved.

CETUS SOFTWARE INC. DISCLAIMS ALL WARRANTIES RELATING TO THIS SOFTWARE, WHETHER EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, AND ALL SUCH WARRANTIES ARE EXPRESSLY AND SPECIFICALLY DISCLAIMED. CETUS SOFTWARE INC. SHALL NOT BE LIABLE FOR ANY INDIRECT, CONSEQUENTIAL, OR INCIDENTAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE SUCH SOFTWARE, EVEN IF CETUS SOFTWARE INC. HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES OR CLAIMS. IN NO EVENT SHALL THE LIABILITY OF CETUS SOFTWARE INC. EVER EXCEED THE PRICE PAID FOR THE LICENSE TO USE THE SOFTWARE, REGARDLESS OF THE FORM OF THE CLAIM. THE PERSON USING THE SOFTWARE BEARS ALL RISK AS TO THE QUALITY AND PERFORMANCE OF THE SOFTWARE.

This agreement shall be governed by the laws of the Commonwealth of Massachusetts and shall inure to the benefit of Cetus Software Inc., and any successors, administrators, heirs, and assigns. Any action or proceeding brought by either party against the other arising out of or related to this agreement shall be brought only in a state or federal court of competent jurisdiction located in the Commonwealth of Massachusetts. The parties hereby consent to in personam jurisdiction of said courts.

This software and the disk on which it is obtained is licensed to an individual or institution user, for his/her/its own use. This is copyrighted software. The user is not obtaining title to the software or any copyright rights. The user may not sublicense, rent, lease, convey, modify, translate, convert to another programming language, decompile, or disassemble the software for any purpose. The user may make one copy of the software for back-up purposes only. The user may use this software on his/her/its own computer(s) only.

WARNING !!!

NOTICE: The use of **ANY** computer security software program is potentially **DANGEROUS** if **not** done with care. You must read **ALL** the StormWindows documentation thoroughly **BEFORE** using StormWindows on your PC.

BEWARE: Careless **OR** incorrect use of this software could possibly lock **YOU** out of your own computer. **IF** you are **NOT** willing to use this software **VERY** carefully, heeding **ALL** warnings in this documentation, then you **MUST** uninstall StormWindows and proceed **NO** further.

StormWindows should be **UN**installed through Control Panel. This will remove the StormWindows files and the changes that the Setup program made to your system. **NOTE**, however, that the uninstallation **may NOT** be able to undo all of the changes that **YOU** yourself may have made to your PC by the use of StormWindows **after** it was installed, so please **DO** remember that **YOU** must undo **ALL** protections **BEFORE** you proceed to uninstall StormWindows.

About Cetus Software

Cetus Software Inc. is the creator of several Windows security programs, for both Windows 3.1x and Windows 95.

Shareware copies of Cetus security utilities are available for downloading from many on-line services as well as on the Internet.

You are welcome to visit our Web site, <http://www.cetussoft.com>, where you may download **free** copies of **all** of our programs (or leave us an **email** message).

Cetus Software mailing address:

Telephone/Fax: 781-834-4411

Cetus Software thanks you for your interest in our products !!!

Overview of StormWindows

StormWindows is a security utility that allows the authorized user to add several types and degrees of protection to the desktop and system of a Windows 95 computer. Intelligent use of StormWindows security measures will allow for the controlled use of any shared Windows 95 computer.

Installing StormWindows

StormWindows should be installed through **Control Panel (Add/Remove Programs icon)**. This will properly install the StormWindows files and icons for access.

PLEASE NOTE: It is **NOT** possible to use StormWindows without properly installing it. Also, it is **NOT** possible to simply copy StormWindows files from one computer to another.

The initial StormWindows password upon installation is "xxxx" (**NOT case-sensitive**). You **MUST** change this to a **private** password of your own choice (4 to 20 characters) **as soon as possible**.

Uninstalling StormWindows

StormWindows should be UNinstalled through Control Panel (Add/Remove Programs icon) . This will remove the StormWindows files and the changes that the Setup program made to your system files.

Note, however, that any uninstallation **may NOT** be able to undo all of the changes that **YOU** yourself may have made to your PC by the use of StormWindows **AFTER** it was installed, so please **DO** remember that **YOU** must undo **ALL** protections **BEFORE** you proceed to uninstall StormWindows.

Access to StormWindows

StormWindows may be accessed by clicking on its icon on the Start Menu, or by double-clicking on its icon on the desktop or on its icon in Control Panel.

StormWindows may also be accessed through the Start Menu by entering "STORMWIN" (not case-sensitive) on the Command Line in the Run Command dialog box, or by searching for "STORMWIN.EXE" (also not case-sensitive) in the Find Command dialog box.

The initial StormWindows password upon installation is "xxxx" (**NOT case-sensitive**). You **MUST** change this to a **private** password of your own choice (4 to 20 characters) **as soon as possible**.

Note that you **MUST** remember the password, as you will **absolutely NOT** be able to start StormWindows without it. This is **VERY IMPORTANT !!!**

CAUTION: It is **very** important that you do **not** remove **any** means of access to StormWindows without **very** careful thought. Since StormWindows is password-protected, there is **no** reason to "hide" it from users, and you **must** be able to access StormWindows easily in order to change security settings. This is **very important**. It is **highly recommended** that you maintain **at least TWO** means of access to StormWindows at all times.

Using On-Line Help

You may move from one topic to another in the on-line Help file by clicking with the mouse on any underlined "jump" item. From the keyboard, you may use the Tab key to highlight any item, and then press Enter. You may also learn more about how to use a Windows Help file by pressing either the F1 key or the "Help" button above (or you may use Alt-H from the keyboard).

Security Strategy

It should be obvious that the use of just any one security measure is not likely to provide much actual security in any particular setting, and that a carefully chosen combination of complementary security measures will be required for most circumstances.

It should also be clear that it would be almost impossible for Cetus Software to provide one single set of recommendations that could provide optimum security under all circumstances. Each situation is different, and each therefore requires its own individual security plan. Nonetheless, Cetus Software does recommend that the following measures be considered when planning any effective security strategy:

Cetus Software recommends that **serious** thought be given to removing access to Windows 95 Explorer. A guest user with even moderate Windows savvy will know how to get past many security measures simply by using this tool to "explore". Cetus Software **does** recommend disabling **ALL** means of access to Explorer (which is still available to the authorized user through StormWindows, of course), though it is clear that it will not always be possible to do this in every situation.

Cetus Software **STRONGLY recommends** the use of the three **Registry Security** settings on the StormWindows System page. Activating the settings for **No Registry Editor**, **No System Policy Editor**, and **No Registry Merging** will prevent a guest user from attempting to circumvent StormWindows protections.

Cetus Software also recommends the use of a well chosen password, one that could **NEVER** be guessed by any guest user, one that employs an uncommon combination of letters, numbers, and punctuation. Avoid the use of institutional names, first names, last names, nicknames, names of spouses, names of children, names of pets, birthdates, or any other simple password that would be likely be tried by any "adventurous" guest user. Unfortunately, any password that is very easily remembered is probably also a password that is easily guessed at.

Main Commands

StormWindows, to the right of the individual property pages in its main window, provides command buttons for several functions that affect StormWindows and/or Windows itself.

Commands for Windows

Since many protection changes provided by StormWindows require Windows to be restarted before they take effect, StormWindows provides for both restarting of Windows and shutting down the computer (for later restart); this shutdown access is also useful if you wish to use the StormWindows No Shutdown Command setting.

RESTART WINDOWS will exit StormWindows and restart Windows, so that any StormWindows changes made may take full effect immediately. **CAUTION:** Any changes made since starting StormWindows **WILL be saved**. (If you wish to **cancel** any changes made, you **must** do so individually **before** exiting StormWindows and restarting Windows.)

SHUT DOWN COMPUTER will exit StormWindows and shut down the computer, so that any StormWindows changes

made may take effect the next time Windows is run. **CAUTION:** Any changes made since starting StormWindows **WILL be saved.** (If you wish to **cancel** any changes made, you **must** do so individually **before** exiting StormWindows and restarting the computer.)

Commands for StormWindows

ABOUT STORMWINDOWS will display information about StormWindows (version number and copyright) and Cetus Software (postal, email, and Web site addresses, and telephone and fax numbers).

STORMWINDOWS HELP will access StormWindows on-line Help.

IMPORT SETTINGS may be used to import all checkbox security settings from a diskette in Drive A:, allowing the authorized user to synchronize checkbox settings on several computers automatically. (Note that the Programs Page listbox contents are NOT imported.)

EXPORT SETTINGS may be used to export all checkbox security settings to a diskette in Drive A:, allowing the authorized user to easily transport a protection scheme to other computers. (Note that the Programs Page listbox contents are NOT exported.)

UNPROTECT NOW may be used to temporarily and quickly remove all checkbox protection settings, for installing software, modifying the desktop configuration, etc. (Note that the Programs Page listbox contents are NOT affected by this command.)

REPROTECT NOW may be used to restore all previous checkbox protection settings in place at the time the Unprotect Now function was used. (Note that the Programs Page listbox contents are NOT affected by this command.)

EXIT STORMWINDOWS will exit from StormWindows. **CAUTION:** Any changes made since starting StormWindows **WILL be saved.** (If you wish to **cancel** any changes made, you **must** do so individually **before** exiting StormWindows.)

NOTE - The Import, Export, Unprotect Now, and Reprotect Now functions do **NOT** affect, **NOR** are affected by, the contents of the various **listboxes** on the **Programs Page**. (These functions **only** involve the **checkbox** settings on all the **other** pages.)

Desktop Page

StormWindows, in its Desktop page, allows you to restrict access to many Windows 95 desktop features and commands.

CAUTION: Many of these restrictions can be dangerous if not used with care. Consider carefully the impact of **each** of these desktop restrictions **before** invoking it. Do **not** remove any means of access to StormWindows without **first** making certain that you **still** have other ways of starting StormWindows. This is **important**.

Start Menu Commands

NO RUN COMMAND will disable access to the Run command on the Start Menu. **CAUTION:** Do make absolutely **certain** that you **still** have some **other** means of access to StormWindows (such as a functioning Start Menu icon) **before** disabling normal access to the Run command. This is **very** important.

NO FIND COMMAND will disable access to the Find command on the Start Menu. **CAUTION:** Do make absolutely **certain** that you **still** have some **other** means of access to StormWindows (such as a functioning Start Menu icon) **before** disabling normal access to the Find command. This is **very** important.

NO SHUT DOWN COMMAND will disable access to the Shut Down command on the Start Menu. **CAUTION:** Do make **certain** that you **still** have access to StormWindows (for its access to the Shut Down command) by **some** means (such as a functioning Start Menu icon) **before** disabling normal access to the Shut Down command. This is **very** important.

Start Menu Restrictions

NO CONTROL PANEL OR PRINTERS will remove access to both the Control Panel and the Printers folder in Start Menu Settings and in My Computer.

NO SETTINGS TASKBAR will remove access to the Taskbar Properties dialog in Start Menu Settings.

NO DOCUMENTS MENU will remove access to documents through the Documents Menu.

Shell Restrictions

NO SAVE SPATIAL SETTINGS will prevent certain desktop changes (such as the rearrangement of desktop icons) from being saved by the system.

NO DESKTOP ICONS OR ACCESS will remove all icons from the desktop, as well as preventing the use of the right mouse button on the desktop. **CAUTION:** Do make absolutely certain that you still have some other means of access to StormWindows (such as a functioning Start Menu icon) before removing access to desktop icons. This is **very** important.

NO CTRL-ALT-DELETE will prevent use of the Ctrl-Alt-Delete, Alt-Tab, and Ctrl-Esc key combinations, preventing "warm rebooting" and keyboard task switching (though the Windows 95 Taskbar may still be used for task switching with the mouse). **CAUTION:** Note that the use of this protection setting will prevent the Close Program dialog box from appearing, so that Ctrl-Alt-Del may NOT be used when a program "hangs" the system, which will require that the computer be physically turned off and then on again instead (unless rebooted from StormWindows).

Programs Page

StormWindows, in its Programs page, allows you to restrict access (as well as restoring normal access) to both entire program folders and individual program links, whether they are present in Start Menu Programs, in Start Menu Proper, or as desktop icons.

The current status of each individual Windows program link (those with the ".lnk" suffix) or DOS PIF file (those with the ".pif" suffix), as well as each program folder (those without any suffix), is displayed in the two listboxes on each of the three property sheets on the Programs Page.

The **VISIBLE PROGRAMS** listboxes will display the individual program links and program folders that are currently accessible through Start Menu Programs and Start Menu Proper. Note that the Startup folder in Start Menu Programs may not be hidden, as Windows will create a new, empty Startup folder the next time Windows is started.

The **HIDDEN PROGRAMS** listboxes will display the individual program links and program folders that have been removed from Start Menu Programs and Start Menu Proper by StormWindows.

The **VISIBLE ICONS** listbox will display the individual program links and program folders that are currently available as desktop icons. Note that Windows will not allow the My Computer system icon to be hidden without hiding all desktop icons by using the No Desktop Icons or Access command.

The **HIDDEN ICONS** listbox will display the desktop icons that have been removed from the desktop by StormWindows.

NOTE - The Import, Export, Unprotect Now, and Reprotect Now functions do **NOT** affect, **NOR** are affected by, the contents of the various **listboxes** on the **Programs Page**. (Those functions **only** involve the **checkbox** settings on all the **other** pages.)

Hiding Programs and Icons

The **HIDE** command will remove a selected program from Start Menu Programs, Start Menu Proper, or from the desktop.

CAUTION: Do make absolutely certain that you still have some other means of access to StormWindows before removing access to any StormWindows menu item or icon by using the Hide function on any of the Programs Page property sheets. This is very important.

The **HIDE** command may be invoked by:

1. selecting a program in a Visible Programs listbox or the Visible Icons listbox and then using the Hide command button.
2. double-clicking on any program in a Visible Programs listbox or the Hidden Icons listbox.

NOTE - The Import, Export, Unprotect Now, and Reprotect Now functions do **NOT** affect, **NOR** are affected by, the contents of the various **listboxes** on the **Programs Page**. (These functions **only** involve the **checkbox** settings on all the **other** pages.)

Note that StormWindows will **NOT** allow the Startup folder in Start Menu Programs to be hidden, because Windows will create a new, empty Startup folder the next time Windows is started.

Note that Windows will **NOT** allow the My Computer system icon to be hidden without hiding all desktop icons by using the No Desktop Icons or Access command.

Showing Programs and Icons

The **SHOW** command will restore a selected hidden program to Start Menu Programs, Start Menu Proper, or to the desktop.

The **SHOW** command may be invoked by:

1. selecting a program in a Hidden Programs listbox or the Hidden Icons listbox and then using the Show command button.
2. double-clicking on any program in a Hidden Programs listbox or the Hidden Icons listbox.

NOTE - The Import, Export, Unprotect Now, and Reprotect Now functions do **NOT** affect, **NOR** are affected by, the contents of the various **listboxes** on the **Programs Page**. (These functions **only** involve the **checkbox** settings on all the **other** pages.)

Opening Programs and Icons

The **OPEN** command will open an Explorer-like window to a selected program group, or will open or execute a selected program link, on the three property sheets of the Programs Page (whether hidden or visible).

The **OPEN** command may be invoked with either of the two Open command buttons on the any one of the three property sheets of the Programs Page.

The Open command button to the left is for programs displayed in the Visible Programs or Icons listboxes, while the Open button to the right is for programs in the Hidden Programs or Icons listboxes.

Note that the various desktop system icons (such as My Computer or Recycle Bin) may not be opened from the Programs Page.

System Page

StormWindows, in its System page, allows you to restrict access to many sensitive Windows 95 system characteristics and functions.

The System page also allows you to control to a great extent (primarily in the area of Registry security) the amount of security afforded to StormWindows itself.

System Control Panel

NO DEVICE MANAGER PAGE will hide the Device Manager properties from the System option in Control Panel.

NO HARDWARE PROFILES PAGE will hide the Hardware Profiles properties from the System option in Control Panel.

NO FILE SYSTEM BUTTON will remove the File System button in the System Control Panel.

NO VIRTUAL MEMORY BUTTON will remove the Virtual Memory button in the System Control Panel.

MS-DOS Access

NO MS-DOS PROMPT OR APPS will disable access to the DOS prompt and DOS programs while Windows is running.

NO EXIT TO MS-DOS MODE will prevent exiting from Windows to MS-DOS mode.

Registry Security

NOTE: The use of these three commands is **HIGHLY recommended** for preventing guest users from attempting to circumvent StormWindows protection measures.

NO REGISTRATION EDITOR will prevent access to the Windows 95 Registration Editor. **CAUTION:** Do make **certain** that you **still** have access to StormWindows (for its own access to the Registration Editor) by **some** means (such as a functioning Start Menu icon) **before** disabling normal access to the Registration Editor. This is **very** important.

NO SYSTEM POLICY EDITOR will prevent access to the Windows 95 System Policy Editor, whether installed on the computer's hard drive or carried to it on a floppy diskette.

NO REGISTRY MERGING will prevent merging of .REG files into the Registry. **CAUTION:** This checkbox **must** be **UN**checked **before** installing any new software, since some setup programs may utilize merging to update the System Registry with new settings. This is **very** important.

Printers Control Panel

NO PRINTERS CONTROL PANEL will hide the General and Details pages in each printer's property sheet.

NO ADDITION OF PRINTERS will disable the installation of additional printers.

NO DELETION OF PRINTERS will disable the deletion of installed printers.

Display Page

StormWindows, in its Display page, allows you to restrict access to many aspects of the Windows 95 screen display, as well as which drives are displayed in My Computer and (in most cases) in Explorer.

Display Control Panel

NO DISPLAY CONTROL PANEL will disable access to the Display option in Control Panel.

NO BACKGROUND PAGE will hide the Background properties of the Display option in Control Panel.

NO SCREENSAVER PAGE will hide the Screensaver properties of the Display option in Control Panel.

NO APPEARANCE PAGE will hide the Appearance properties of the Display option in Control Panel.

NO SETTINGS PAGE will hide the Settings properties of the Display option in Control Panel.

Drives in My Computer

NO DRIVES IN MY COMPUTER will hide access to individual drives in My Computer (and, in most cases, in Explorer). Usually, when a drive is hidden in My Computer, that drive is also hidden in Explorer; the exception is the C: drive, which usually is not hidden in Explorer.

CAUTION: Do make absolutely **certain** that you still have some **other** means of access to StormWindows (such as a functioning Start Menu icon) **before** removing drives from My Computer. This is **very** important.

Network Page

StormWindows, in its Network page, allows you to restrict access to many Windows 95 network features and commands.

Network Control Panel

NO NETWORK CONTROL PANEL will disable access to the Network option in Control Panel.

NO IDENTIFICATION PAGE will hide the Identification properties of the Network option in Control Panel.

NO ACCESS CONTROL PAGE will hide the Access Control properties of the Network option in Control Panel.

Network Neighborhood

NO ENTIRE NETWORK will hide access to the Entire Network in Network Neighborhood.

NO WORKGROUP CONTENTS will prevent workgroup contents from being displayed in Network Neighborhood.

File Sharing

NO FILE SHARING will disable file sharing over a network.

NO FILE SHARING CONTROLS will disable the Sharing properties of the directories in Windows 95 Explorer.

Print Sharing

NO PRINT SHARING will disable print sharing over a network.

NO PRINT SHARING CONTROLS will disable the Sharing properties of the Printer directory.

Passwords Page

StormWindows, in its Passwords page, allows you to control several Windows 95 password characteristics, as well as allowing you to change StormWindows' own password.

Note that you **MUST** remember the StormWindows password, as you will **absolutely NOT** be able to start StormWindows without it. This is **VERY IMPORTANT !!!**

Passwords Control Panel

NO PASSWORDS CONTROL PANEL will disable access to the Passwords option in Control Panel.

NO USER PROFILES PAGE will hide the Profiles properties of the Passwords option in Control Panel.

NO CHANGE PASSWORDS PAGE will hide the Profiles properties of the Passwords option in Control Panel.

NO REMOTE ADMINISTRATION PAGE will hide the Remote Administration properties of the Passwords Control Panel.

Windows Passwords

MASK PASSWORDS will hide Share Windows passwords with asterisks.

NO PASSWORD CACHING will disable the caching of Windows passwords.

ALPHANUMERIC PASSWORDS will require Windows passwords to consist of numbers and letters only.

StormWindows Password

The initial StormWindows password upon installation is "**xxxx**" (**NOT case-sensitive**). You **MUST** change this to a **private** password of your own choice (4 to 20 characters) **as soon as possible**.

Note that you **MUST** remember the password, as you will **absolutely NOT** be able to start StormWindows without it. This is **VERY IMPORTANT !!!**

Open... Page

StormWindows, in its Open... page, allows you to open up various Windows programs and features (whether still visible, or hidden by StormWindows).

(Please note that, depending on the severity of restrictions in place at any one time, not every function on the Open... page will be available.)

OPEN MY COMPUTER will open a My Computer window, usually even if otherwise hidden by StormWindows.

OPEN DESKTOP will open an Explorer-like window to icons that are present on the Desktop, or would be present on the desktop if the No Desktop Icons or Access command was not in effect.

OPEN CONTROL PANEL will open a Control Panel window, usually even if otherwise hidden by StormWindows.

OPEN PRINTERS will open the Printers folder, usually even if otherwise hidden by StormWindows.

OPEN REGISTRY will open Windows 95 Registration Editor. **CAUTION !!!** - Do **NOT** edit the Registry at all if you do not know **exactly** what you are doing. Registry changes are **immediate** and not always reversible, and can even prevent your computer from running.

OPEN PROGRAM MANAGER will open Windows 3.1 Program Manager. (The "old" Windows 3.1 Program Manager is automatically installed by Windows 95, and may be still be useful for certain functions and for accessing programs.)

OPEN FILE MANAGER will open Windows 3.1 File Manager. (The "old" Windows 3.1 File Manager is automatically installed by Windows 95, and is capable of handling certain tasks that Windows 95 Explorer cannot do.)

OPEN TASK MANAGER will open Windows 95 Task Manager.

OPEN EXPLORER will open Windows 95 Explorer (allowing access to Explorer by the authorized user, even if normal means of access to Explorer may have been removed).

Shareware Evaluation

A **limited license** is granted by Cetus Software to any individual user or institution to install and test a shareware copy of StormWindows on **ONE** computer for a **25-DAY** evaluation period. At the end of this trial period, StormWindows

MUST be removed from that computer. It is expressly **PROHIBITED** to install a shareware copy of StormWindows on **MULTIPLE** computers under **ANY** condition.

Registering StormWindows

There is a registration form at the end of this document.

A Single-PC copy of StormWindows may be registered to an individual (NON-institutional) user for \$25.00.

A Single-Building copy of StormWindows may be registered to an institution for \$95.00.

A Corporate License may be obtained for multiple sites, the cost being determined primarily by the actual number of locations to be registered. **Please** contact Cetus Software for details.

For payment, Cetus Software can accept a registration paid for by a check in USD, or a registration by purchase order (to be paid for later by a check in USD). We can also accept Visa, MasterCard, and American Express (but please note that, at the time of registration, we need the EXACT and COMPLETE billing name AND address of the CARDHOLDER for card verification before we can process a credit card order). We even accept wired money transfers in \$US (our bank is Citizens Bank, ABA 011500120, account 1102179555).

Cetus Software mailing address:

Cetus Software Inc.

Post Office Box 700

Carver, MA 02330 USA

Cetus Software may be reached by:

Email: FwCetus@aol.com

Web: <http://www.cetussoft.com>

Telephone/Fax: 781-834-4411

Individual Licenses

An **Individual (Single-PC) License** for StormWindows entitles a registered **individual (NON-institutional) user** to install StormWindows on any **ONE** computer that he/she **personally** owns, but he/she **must NOT** allow his/her registered copy of the program to be installed or used on **any** other computer. Furthermore, a Single-PC copy of StormWindows registered to an individual user may be legally installed on his/her own **PERSONALLY owned** computer at an institution, but that individually licensed copy of StormWindows **may NOT** be installed on **any** other computer(s) at that institution.

An **Individual (Single-PC) License** for StormWindows is intended to be used **ONLY** by an individual **private user** on his/her own computer, and may be purchased **ONLY** by an individual (**NOT** by an institution). Cetus Software will **NOT** accept any registration order from an individual that is to be paid for with an institutional check.

A **Single-PC** copy of StormWindows may be registered to an individual (NON-institutional) user for \$25.00.

Registered **Single-PC** copies of StormWindows will be clearly marked to show that a **Single-PC License** has been granted to one particular **named individual**.

There is a registration form at the end of this document.

Site Licenses

A **Single-Building Site License** for StormWindows entitles the registered institution (school building, business location, organization headquarters, etc.) to install the program on an unlimited number of computer(s) belonging to that institution at **ONE particular specified location**, but registered copies of the program **may NOT** be distributed beyond the boundaries of that particular location.

Please note that it is **NOT** the **NUMBER** of computer installations **BUT** it is the **intended USE** of the computers at an institution that require an institutional Site License. (An institution that intends to install StormWindows on only one PC **must still** purchase a Site License.)

A **Single-Building** copy of StormWindows may be registered to an institution for \$95.00.

Registered **Single-Building** copies of StormWindows will be clearly marked to show that a **Single-Building Site License** has been granted for use at one particular **named location**.

There is a registration form at the end of this document.

Corporate Licenses

A **Corporate License** for StormWindows entitles the registered institution (school system, business organization, etc.) to install the program on an UNlimited number of computer(s) belonging to that institution at an UNlimited number of sites, but registered copies of the program **may NOT** be distributed beyond the boundaries of sites belonging to that particular institution.

A **Corporate License** may be obtained for multiple sites; the cost is determined by the actual number of locations to be registered as well as by the number of registered diskettes required (one per institution or one per each site). Please contact Cetus Software for details.

Registered **Corporate** licensed copies of StormWindows will be clearly marked to show that a **Corporate License**

has been granted to one particular **named institution**.

There is a registration form at the end of this document, below:
