1.1 Sweet Cheater Version 4.5

SWEET CHEATER V4.5

by Keith Krellwitz

This cheat list contains over 950 cheats, hints, and level codes for the Amiga and CD³2\$. The game titles with my name after them are the ones that I have found. I have put quite a bit of time into finding some of these cheats, so if you add any to your list all I ask is that you give me credit. If you upload the list to a bbs or include it on a compilation disk please do not remove or alter the header.

All the games with an asterick (*) in front of them have been verified. If the game has been verified and has more than one cheat, the cheat right after the game title is the one that has been verified, but in some cases all the cheats may work.

Some of the cheats may have changed throughout the list due to the fact that I have verified a lot of them and made corrections when needed. If a cheat didn't work before you may want to look at the cheat again, it may have been fixed. I try to verify as many as I can, but I don't have most of the games. I won't verify a cheat with an * unless I have personally tested it and found that the cheat works.

A new version will be uploaded to Aminet when I get over 50 new cheats.

If you know of any cheats, level codes, and hints that are not on the list or if there is an error on any please send mail to:

or send email to either address:

abaddon@longyear.acs.nmu.edu

If you send me a cheat that I don't have, and I will put your name after it and in the SOURCES section to give you credit for the cheat!

AAARGH!:

At the start of each screen you'll find various buildings. Blow fire over them, and then hit them. This will make them fall down a lot faster. When you burn or knock down a house you get an egg. To beat the other monsters in a fight for an egg, don't jump around and breath fire, just hold your ground and punch forward. After three or four falls, your foe will stay down. Keep eating, even if it dosen't show any increase on screen, your health will skyrocket.

ABANDONED PLACES 2:

This cheat will increase your character's experience significantly. Attack and kill any single monster (or group of monsters). When it (or they) begin to visibly fade away, cast any {HOLD MONSTER} spell that you have such as {DREAM} or {HOLD EVERYTHING}. The creature will cease dimming and just sit there. Now you can attack with your fighters or cast attack spells (including {FIRE AREA}). To rake in experience points with no worry of the monster going anywhere until the spell wears off. This can be verified by watching the experience line in the character sheet grow while you are attacking the faded creature. If you are quick enough, you can refreeze the monster, otherwise just go and find another one to repeat your trick on.

 Metal, Rock, Snow, Brick and Crypton (Use on depth 2).
 '[' & ']' _____Toggle through existing levels.
 'F1' _____Play level in one player mode.
 'F2' _____Play level in two player mode.

(DESIGNING A MAZE)

Each level consists of 3 layers, and pressing 'D' will go through them. Depth 0 is where the backgrounds are designed, depth 1 is where the ice, mud and mines go, and depth 2 is where you actually design the maze. On depth 2, pressing the 'SPACEBAR' takes you to the block select screen, where you can select any block by pressing the fire button on your joystick. This then puts you in {block} mode (which appears at the bottom right of the screen) where you can place the block by pressing fire again.

(PLACING CHARACTERS)

Select depth 2 and press 'M' to go into "baddie" mode. Position both players by pressing '1' and '2' at the desired position. You can toggle through the baddies using the comma ',' and full-stop '.' keys, and can place them using fire, or replace existing baddies by first selecting the space, and then adding your preference. Baddie characteristics can be changed by placing the cursor over it and then using the arrow keys:

'Up' _____Increase baddie speed.
 'left' _____Decrease rate the baddies drop hazards.
 'Right' _____Increase rate the baddies drop hazards.
 (from 01 (fastest) to 99 (slowest)
 (00 means it'll never drop anything)
 'Down' _____Increase drop speed by 10.

Pressing '9' will change the speed at which the baddies will then appear. Once you've placed all the initial baddies, pressing 'RETURN' takes you onto the "que" screen, where you can place up to 50 replenished ones. Pressing '0' will change the time between these baddies appearing. Any new levels can now be saved on a blank disk by returning to the main menu and selecting the save option.

BANE OF THE COSMIC FORGE:

The password to enter the door in the SE tower of the 1st level is "SNOOPCHERI". Use the rotten cheese on the mousehole. Some small help for playing the game successfully: When you create your characters, it may be a good idea just to make all of them Dracons.

This is untested, but unless you have at least one of this fire breathing race you surely wont survive the game. So maybe it would be good to have more. Use a good mix of the classes, try to take one of each spell class and a good solid thief that is at full strength. Get a good enough thief and you dont need a fighter. It may be slow, but keep rolling till you get the best character possible. Be sure to make at least one character female, there are places in the game where this is a must. Don't do it and be sorry later! Diversify your skills.

Have each character specialise in a few skills relative to his class. Do not worry about developing weapons skills, you have no use for them if you created your party correctly. In fights early in the game use DRACONS BREATH ATTACK, just be careful not to over extend yourself. Rest after each encounter, backing up your hard work. Always search the area after a combat. Search each square you step in. Not only this, but search facing all four directions, many things can only be found that way. Thieves are not always true. If you find a lock and have your thief open it, allways guess it is poison unless you are 100% sure (I.E. tried it before) because it is better to suffer something else than to die by getting this wrong. Don't bash doors early in the game! If your characters are not very strong you will be sorry. Jammed doors do you no good, as you might never be able to open them again. Same goes for picking the lock. Wait till you get a caster capable of conjuring knock knock with at least 18 points (prefereably 24) and do it this way. It is much more sure. Once you know there are secret panels or buttons, keep walking past them until you discover them. You can find them by looking at the maps and know where they are, sometimes it takes awhile to sense them.

BIO CHALLENGE:

During play, press 'ESC' to pause the game and press 'G'. This will take you to the end of the level guardian.

LEVEL 1: Get the green armours as soon as possible. If you have all of the amulet, don't go to the sphere unless you have collected at least four lots of monster remains, you'll need them to battle the end of level guardian. He's a bit soft in the head, so time your jumps carefully, and hit him there.

LEVEL 2: There are four planets to visit, go to everyone if you want to get maximum points. Again, the green armour is very useful, so get it as quickly as possible. There's

loads of ammo for the guardian of this level,
unfortunately that means there's loads of monsters to deal
with. The back of the guardians head is the weak spot.

LEVEL 3: Stand on the slabs and summersault. There are six
planets here, and the transporters are more difficult to
so, so you have to watch more carefully.

*CABAL:

During play, type "SCHLIKA". The border should flash. Press 'F2' to finish the level.

If you pause the game you can still move your guns crosshair.

(GENERAL HINTS)

1. Shoot as many of the buildings as you can, as they block your
-

shots at attacking / hiding enemies.

2. Shoot the enemies at the bottom of the screen as the bullets they fire need less time to get to you and can often trap you in a corner.
 3. Don't forget that you can shoot the enemies' bullets!
 4. Try to pick up the bonuses straight away. The 100, 200 and 300 point bonuses are very useful if you want extra lives.
 5. Collect special weapons straight away as their rapid fire removes buildings faster, giving more breathing space.
 6. The grey uniformed soldiers (the ones that take a few shots to kill) can give a grenade or a special weapon. When he does, two men carrying a stretcher will appear. Shoot these and they will give you two grenades, collect them and then shoot them again before they go, to receive two more grenades.
 7. Never stay in corners for too long, the enemy has a habit of zeroing in on you.
 8. Don't waste grenades on buildings unless you really need to. If you opt to shoot in small bursts at every building rather than concentrating on one building at a time then a grenade may finish the job a lot quicker.
 9. Try not to get killed when the end-level guardians appear otherwise your FOE meter will drop to zero and you'll have to start again.

*CANNON FODDER:

Go to the save game option, then the game requests a name type "JOOLS". Cheat mode active will flash at the bottom of the screen and the ranks and abilities of your men will have increased.

(HINTS)

1. In Choppas, land on the enemy to kill them, safer than landing and getting out.
 2. I missions in which you have control of a lot of troopers separate the lowest ranking trooper from the rest and give him all the weapons, make sure the rest are safe, then attempt the mission with one trooper. If the trooper dies just press 'ESC'. This saves a lot of troopers later, such as in mission 18 phase 5 of 5 - The Door.
 3. Troopers are able to throw grenades quite along way and over walls, trees, and buildings. Use this to your advantage to protect against Biggunz and Jeeps. To throw a grenade a long way, simply position the pointer further than needed.
 4. Buildings can be destroyed even if you can't see them. For instance, if a trooper is in Biggun and there is a building slightly off the edge of the screen, roughly aim at the building making sure the pointer is at the very edge of the
-

screen and fire.

5. Learn to control Jeeps and Skidooz early on (how to skid them). In later levels you may need good control to hit ramps at correct angles otherwise you can blow up if you hit walls. This is also useful to get away from shells, rockets, and grenades.
 6. An effective way of destroying snipers is to just run straight towards them and shoot you guns. Don't waste grenades on them unless it is necessary.

While in the pause mode, type "GROW OLD ALONG WITH ME" (include the spaces). You should now see the message {CHEAT MODE ACTIVE}. Pressing the '+' key on the numeric keypad protects your mantas and aavs from missile attacks. The '-' key can be used to turn this off. Pressing the following keys in sequence: 'HELP', 'Q', 'S', 'CTRL', and 'ALT', gives you a little message. Pressing the '9' on the keypad displays the current level. '6' and '8' have some other

effect. Returning to the title screen, press the '+' and '-' keys to view all objects in the game.

While in the WALRUS arming menu, select nine Harbinger surface to surface missiles and put them in the AAV. Select the AVATAR CHEMICAL LASER and place it over the missiles. Then select the pod you want (ACCB, VIRUS BOMB, FUEL) and place it in the AAV. Then, when you've launched the AAV, look at it's weapons and you'll find you have both missiles and laser! On returning to the carrier any missiles you have left will be added to the ship's stores. Carry on doing this and hundreds of missiles can be yours.

Try pressing 'CTRL' and 'M' on the main screen for some interesting effects.

When starting a new colony name it "Charlotte". This will allow you to see all maps instantly, other European ports, check other county's statistics, and gives you \$50,000. When you access the other countries european ports you can spend all there money, I did this by recruiting loads of people, but you can buy anything.

If you rename your colony to some thing else you can then start another colony called charlotte and get another \$50,000. I started a colony got 50000 then abandond (sp) it lot's of times and started the game with 500,000.

CURSE OF THE AZURE BOND:

See the POOL OF RADIANCE cheat.

In case anyone was wondering, The 'Wizard in Red' refers to Dracandros. He is the owner of the Crescent Moon bond. The 'Woman in Green' refers to the leader of the Cultists of Moander. They, of course, are the owners of the Mouth in the Hand bond, which is the symbol of the God Moander. The 'Lord of the Black' refers to the leader of the Zhentrim, or 'Black Network', an evil alliance of priests, mages and thieves that operate out of Zhentil Keep. They own the big 'Z' in the Triangle bond. Lastly, 'The

Flamed One' is, of course, good old Tyranthraxus. He owns the Flaming Bond, which is the Symbol of Tyranthraxus.

To defeat Tyranthraxus, you must gather the Amulet of Lathander, which is in Zhentil Keep, the Helm of Dragons, which is currently being kept by Dracandros in his castle near Haptooth, and the Gauntlet of Moander, which is kept by Mogion (the Woman in Green!) in Yulash. You must take these items to the Pool of Radiance.

DELUXE GALAGA (Ver 2.3 & 2.4): (Sean Courtney)

If you die during a warp malfunction, the game skips the tax-free shop and the next level. You can use this to your advantage in the harder levels, especially in the Big Trouble stages. So make sure you have plenty of lives left. When you get to the level you want to skip, especially Big Trouble, just pray for a warp malfunction! If you get a warp malfunction, just kill yourself once (It's a good idea not to do this until there's only one alien left on the screen).

(OTHER HINTS)

1. It is generally not a good idea to spend any credits until you have 500. When you get 500 credits, buy the Super Weapon.
 2. If you hold down the fire button (make sure to disable autofire if you have it on) from the moment you grab the Meteor Storm icon right up to the end of the Meteor Storm, you will get the secret \$5000 bonus (This only works in version 2.4 and possibly the upcoming 2.5).
 3. On Version 2.4, it is not a good idea to buy the \$3000 weapon until you're in levels 51-75.
 4. The weapons that cost \$750 and higher are generally not very handy unless you have autofire (Ver 2.4). If you do have autofire and have one of these weapons, what you have is an incredibly nasty weapon!
 5. You can also "cheat" by using a hex editor and editing the main program. Just find the part of the code that lists all the
-

prices in the tax-free shop (make sure they are not part of the menu, if you modify the menu in any way the game won't run!) and change the numbers to whatever you want. This way, you can make everything cost nothing if you want! However, you'll still need \$50 to enter the shop, and \$400 for continues (or \$200, in version 2.3).

(GAME SECRETS)

01. Catching a skull will add to the chances that extra life and cash multiplier bonuses appear.
02. By shooting the hurry-up ship, you can collect the rank marking that you are missing.
03. When a smart bomb have exploded and the gems are falling. You can collect them by holding down the joystick.
04. If you have a multiply when entering the meteor-storm, you may get alot of points.
05. Catching a warp icon in an alien stage with a bonus level will give you a perfect score.
06. Red, Green and Blue skulls will give you a very good weapon. Full fire power and the best ship speed.
07. When a hurry-up ship have appeared 8 times. A money ship will appear. Shooting this ship can give you alot of money.
08. If you have a weapon type, and catch the same weapon, you will get more firepower.
09. Completing the Meteor-storm will give you 100,000 points and 1,000 in cash. And if you ... hmm. He He..
10. You can figure out what skull you have not taken by looking at the colour of the meteors in the meteor storm.
11. If you have caught 2 aliens and the scope is active. You can get alot of points by the aliens off the screen.
12. If you have the rank of Admiral and you buy more rank markings, you will get 1,000,000.
13. Having a multiply active when completing the game will give you alot of points.
14. If you have all the rank markings for a new rank, and then buy more rank markings, you will instead buy a new rank.

DETROIT (ECS & AGA): (Terry Wood)

If you want to be sure to earn a profit in your first month of DETROIT, you can plug the following number values into the appropriate places in the tutorial (see "Technical Supplement and Tutorial" booklet). They will guarantee you a reasonable return

for at least your first few months in business. The first set of values gives you hints, the second set gives you decent, but not optimal exact numbers, and the third set gives you the absolute best numbers.

Important Tutorial Change: When you first start the game, you will now see a difficulty panel appear with possible settings. The toughest setting is LOAN, where your company starts off in debt to the bank, with no capital funds. The easier the setting you choose, the more money your company will have as a beginning stake. In order for these numbers to work in the tutorial, set the difficulty level as medium.

All armor, treasure and weapons inside palaces are restocked every time you enter. Send the strongest character in to grab the equipment, then distribute it among your band. If you need some quick gold, do this repeatedly, then go see the weaponsmith.

Get all the experience points you want by going to Prince Haagkens castle. Make your way past the bats, past the first fireplace with the trap to the second fireplace. In front of the fireplace is a switch that activates a door two or three rooms farther on in the castle when you step on it. This door leads to a water fountain. Looking into the fountain transports you to a room filled with water that has a never ending supply of water monsters. Take your best weapon and armour with you. Set your character on 'auto kill' and if he or she is able to hang in there, you can leave the character in the room for several hours or all night killing off zillions of monsters. Do this for each of your characters and you'll easily be able to kill the giant dragon.

Make two copies of disk 2 then make up your parties on both disks.
Play the game as usual, but when you find any secret passages or

walls, or unlock any doors, insert the other disk and continue playing for a short while. This passes all the data onto this disk. Replace the original disk and continue playing and now, if you get stuck in the game and you have to start again, simply continue with the other disk and all the doors that were previously locked will be open. Plus, you'll be able to pick up the keys that you needed to unlock them as a bonus!

EYE OF BEHOLDER II:

1. Load the game as normal and select "CREATE NEW PARTY". When the empty boxes appear, click on the top left box, then select race, class, alignment and portrait. Now go to the modify box and boost all the statistics in this order: STRENGTH, INTELLIGENCE, WISDOM, DEXTERITY, CONSTITUTION, CHARISMA, AND HIT POINTS. Now you can click on strength and boost it to maximum, regardless of limitation put on the race or class of the character, so from now on, for example, you can have a super-hard wizard with a strength of 18/99.
2. At the character generation screen, always increase all stats that you can (that includes hit points) to as high as they will go.
3. If you want a mage, cleric or paladin to use a two handed weapon as well as magic, then do the following. Put the weapon down on the ground, and their spellbook or magic symbol in their second hand. Click the right mouse button on this for a list of spells to appear. Pick up the two handed weapon and place it in the characters primary hand. As the list of spells is still up, they can now cast spells and use a two handed weapon at the same time. You will have to repeat this process after using the compass etc.

On the wasp level, stand on the spot where the two rooms join (the room to the south which has a crack in the wall - the hornet's nest) and rest. This should generate four wasps which can be killed easily to gain experience points.

Advancement in rank has nothing to do with the amount of credits to your name. It is related to the number of missions you complete and ships destroyed. Travelling to space stations requires you to jump until you cannot get any further. Guide to completing the missions:

GLOBULUS:

To activate the cheat mode type "Zvmo!EG" as a password. Type exactly as shown.

The most important thing to remember is that all the puzzles can be solved without losing a life, so if you lose a life and think its the only way to solve the screen, look closely. Some of the

puzzles get pretty obscure after level 10, but once you eventually beat them you'll kick yourself for not seeing the solution earlier.

Look before you leap. Think about how the screen will look from a flipped perspective. A lot of jumps you make will be unnecessary and waste time and switches if you don't.

Make sure you have enough switches, at least 10 per screen. It is possible to get stuck on a downward slope with no way to get back up or kill yourself, and the only way out is to press 'ESC' and start the whole game over.

 - Halfway through the match, swap Laws for Wells and Wratten for Harris.
 - The best pitchers are OLIVER, PEREZ, LEARY, COOK. The others will only be successful for a short while.
 - Never pitch fastballs to the center as they will usually result in home runs.
 - Change pitchers after a few innings, because as they get tired, their accuracy and speed get worse.

HEROES OF THE LANCE (SSI):

SOME GENERAL TIPS:

Arrange your party so that the first line consists of two strong

warriors, raistlin and goldmoon. This allows you to use Raistlin's magic and the healing staff of goldmoon without too much hassle. Save tanis and riverwind for the later levels, where the bows come in handy.

When fighting gully dwarves, use Tasslehoff who is the same height as them. His sling stones will never miss. Avoid fighting hatchlings, they're not worth it. Just turn and run when you meet one; when you reach an intersection move into a new path and wait a little. When you return, the hatchling will have gone.

KILLING BOZAKS: TWO METHODS:

- (1) Get raistlin to use a web, sleep or charm spell to stun it, then send a warrior to clobber it to death
- (2) Select Flint, who is a dwarf; 9 out of 10 times, the bozak's shots will go over his head; get close to enter melee combat, and use low thrusts to kill it.

SPECTRAL MINIONS: They're easy to kill, so use a warrior.

WRAITHS: A well-timed throw of an axe kills them every time. If you miss, use a sword and chest thrust movements. Don't let it get too close to you!

SPIDERS: Use low thrusts to keep them at bay. If they get through your guard, retreat until you can turn and fight again.

The blue and green potions restore health, red slows down monsters, and yellow give your characters extra confidence.

IT CAME FROM THE DESERT:

Before attempting to go into the ants' nest, you should first save elmer to get more flamethrower fuel. Some time between the 8th and 10th (i don't remember the exact day), he will leave a note in his station saying that he is going hiking in the sw volcanic cone. Go to the volcano, fight the ants, and next day, visit elmer's station. He'll thank you for saving his life and give you more flamethrower fuel. The entrance to the ants' nest will never appear on the main map, but there are several other ways to get there:

- By taking a flight from Hilber's field.

- By driving a tank from a battle going on at a nearby location.
- By going south when you are in a battle at the M1 mine.

The entrance to the nest doesn't stay open long enough for you to get in before the ants start invading the various locations in the town, so you'll have to wait until they do. The 11th is the best day to enter the hole since it is very hot and there are few ants around. If you try cooler days, there will probably be too many of them around for you to handle. Also, if you decide to get to the hole by plane, you can land safely on the dirt road parallel to the tracks leading to the m1 mine.

For those who are having trouble getting to the ants hideout, it is located about one screen due south of mine one. The best way to gain access to the tunnel is on the morning of day 11. Go to the airport and get the plane. Fly to mine one (southeast from the airport) and land on the road in front of mine one. Get out of your plane and walk to the center of the main building of mine one. Walk south about one and a half screens and the hole should open and a ant will crawl out. You must kill the ant and run to the hole before it closes. You will get about 4 or 5 chances to get in. Once you are in the hole you will automatically have the flame thrower and the timed dynamite charges. There are two levels of the ants chambers, a top level and a bottom level. You must make a map as to where you have checked. YOU can do this by putting the game on pause with the left mouse button. This will keep the ants off you while you draw maps. Once you have made it to the bottom chamber repeat the map drawing till you find the queen ants chamber. You will need it to get out after you plant the charges. To plant the charges once in the queens chambers move close to the queens left side of her body. Once you walk around her left side the music will stop and a slow ticking will start. You will have to get back to the place you entered on the second level. If you get back before the bomb goes off you will win the game.

NOTE:

It means nothing to gather information about the ants through out the game. The mayor will not listen to anything you present in evidence. He will call an alert only after his car gets eaten on the afternoon of June 11.

It will do no good to escape the hospital as you have to sleep anyway. Even thou it will do no good to escape from the hospital it's a fun arcade sequence to play.

Even with the solves given above you still must learn how to fly the airplane. To get the right altitude to save fuel, after you take off fly east or west. Back off the throttle till the shadow on the ground comes up and just touches the wing of the plane. You will then have the right speed and altitude. The faster you fly and the higher you go the more fuel you will use. These settings will conserve enough fuel to let you fly and not run out of gas and return to the airfield and land if you blow it getting into the ant hole.

When you start the game, on the first roof you come to, above a sign saying "Arctic Toys" you will find five objects, which are, from left to right, an apple, an Earth globe, a cake, a hammer and a tap. The first letters of each of these added together (AECHT) is an anagram of the word CHEAT. Pick up the objects in the correct order (Cake, Hammer, Earth globe, Apple and Tap) to receive an invincibility shield lasting 10 minutes. When the cheat is activated, flashing fish form around Robocod, and the music speeds up. Also, if now you go straight into the first room, and then exit immediately you will find that all of the castle doors have been unlocked, allowing you to access any level.

On the sports equipment level after the second spike are five objects in a row, which, in order, are some Lips, a Violin, an Earth globe, an Ice-cream and a Snowman. The first letter of each of these added together spells out LVEIS, which is an anagram of the word LIVES. Collect these in the correct order (Lips, Ice cream, Violin, Earth and Snowman) for infinite lives.

In some point of the game (I do not know where), there are five objects that spell out the word POWER. Collect them in the following order: Penguin, Oil, Wine, Earth and Racquet.

Going into Map Select mode allows you to leap to various points in the game. These are accessed by using the following numbers:

01 Level 1-1	19 Bonus Level 6	37 Level 5-1
02 Level 1-2	20 Level 4-1	38 Bonus Level 10

(SECRET ROOM LOCATIONS)

There are two hidden worlds behind the main tower, another sweets level (including a Licorice Allsorts World, the infamous Bouncing Jelly World, another Cake World and an upside down Jelly World) and an extra scrolling section. To reach them, run along the ground floor - avoiding the doors - then go up and over the first flight of stairs. From the bottom of the second (smaller) tower, make your way up to the landing above Dr. Maybe's final door and run left into the wall. You'll disappear behind the screen and arrive in the Secret Tower room. But who is Katie?

Once you've finished the bath level, drop down to the bottom of the castle, and walk left until you get to the small snowman statues. Jump on these and they'll turn into a moving platform. Once you get to the top of the screen, walk left into thin air and jump. By now you should be next to some doors. Go through them for bonus city!!

Go to the same place after finishing the circus room (the last room before the end of game baddy) and stand on the golden snowmen again. A platform made of two bonud blocks should float upwards, revealing a secret tunnel. At the end of this are even more extra lives and stars.

Do as above after the sweets level, but go to the left of the castle. Go on the snowmen once more, and at the top of the screen grab the umbrella and collect all the goodies while you're floating down.

On the second teddy bear level, keep jumping over the spikes until you see a hole above you. Jump through this and catapult yourself off the bus there. Once you've done this, get on the higher level and keep walking left, bounce on the trampoline and collect the wings. Now fly along the top of the screen to the right and you should find a different exit. Go through this for a special bonus level.

Complete a level with does not feature a guardian and you will always find something new when you return to the castle "selection" screen. In one case you will find a whole sequence of lifts and things (see above) that lead to a door that you cannot normally get to. If you go to the very right of the factory screen and look down you will see a load of crowns, which you can access after coming back from other levels.

It is possible to finish Robocod by only doing half the levels. A choice of two new doors to enter is given when the correct level is completed. Start by completing the Fluffy Toys one and then by doing the Cars one.

Finish the bath levels and as soon as you come out of the door run straight to the golden snowmen in the bottom far left outside the castle. Jump into these snowmen and you'll float upwards to the top of the screen where you'll be met by a door. Getting through this door is tricky but worth it. Inside are loads of extra lives and energy stars. Go to the same place after finishing the circus room (the last room before the end of game baddy) and stand on the golden snowmen again. A platform made of two bonus blocks should float upwards revealing a secret tunnel. At the end of this are even more extra lives and stars.

KINGPIN BOWLING: (LSD)

This cheat requires really fast autofire, but you may be able to emulate it on a joystick/pad by pressing the fire button really quickly. During play, if you line up the man where you want, and then press down the autofire, it will generally throw the ball down the center of the lane. The less force there is, the closer to the center of the lane the ball will be bowled. If you put your man to the far right, and put the speed up to almost full force, you can generally bowl a perfect strike. Its a very useful technique.

Also, if you have a single pin left, or a similar situation in your game, then this is an excellent technique to line up the ball.

NOTE: This cheat will not guarantee a strike, or spare every time.

KRISTAL:

FIGHTS - Proficient swordplay is essential if your to get anywhere in the game. The neck chop is one of the more effective blows, but the program blocks repetition of single moves. To get around this, occassionally switch to a differnt move in order to enable the neck chop once again. Give generously to the poor and you'll be a step closer to obtaining the sword of the spheres.

THE PALACE - To enter the palace, you'll need to get the invitation from the elusive Gloop, found in Novala. Once you have it, keep out of fights or you could lose it for good. When you get into the palace, ask nedrod three questions and he will give you the talisman, which can help you find another useful item. Answer the princess's question with {ITS A SECRET}. She will give you the ring of belz, which will only work in conjunction with the spell scroll.

IN GENERAL - Objects are not always found in the same places from game to game, so a detailed search of both fore and backgrounds is often in order. To survive the final confrontation, a high psychic rating is needed, which can be increased by donating skringles to the poor. Disorderly conduct can have the opposite effect. The safest technique in the space battles, is to slow right down as soon as you see the aliens shoot them all, then power at full steam until the next lot. Follow readheads ship if you see it. Heatpro tablets are necessary if you beam down to one of the hotter planets. Makes notes of what you are told, and use any new names or subjects to weavel out every last bit of information from the characters.
