Chapter 1

NUMBERx

1.1   NUMBERx

```
                              NUMBERx  By E.Manzoni

    Release Date: 25.10.97

            Introduction
             -  A quick introduction

            Installation
             -  How to install

            Interface Commands
             -  Internal commands

            Play
             -  How to play

            Disclaimer
             -  IMPORTANT!

            Contacting the author
             -  How to get in touch with me
```

1.2   How To Play

```
            How To Play ?

Very easy. But NUMBERx is real thinking game...

1.  Choose number beetween  3 to 7
2.  Click on ABOUT Button for little information
3.  Click on START Button for to play
```

Now appears a new screen where you can choose if you want to play
alone or with your friend. How ?

Simple click on CHANGE Button if you want to play with a friend
When you have chosen click on OK Button.

No TIME LIMIT but you have max. 15 possibility then the game finish.

Now click on a number (0-9). When you have the same numerals that you
have chosen, the computer 'll answers:

Example of 4 numerals

YOUR NUMBER	COMPUTER NUMBER	ANSWER
0123	1093	Red-Red-Green

Because:
The first number is right but in wrong position
The second number is right but in wrong position
The third number not exist
The fourth number is right and is in right position

Other example:

YOUR NUMBER	COMPUTER NUMBER	ANSWER
9876	0569	Red-Red

The first number is right but in wrong position
The second and the third numbers not exist
The fourth number is right but in wrong position

If you click on STOP Button the game finish, and appears belove screen
the correct number.

Click in small Button (OK) for new game.

If you have chosen to play with a friend appears a input > where you
or your friend must write a number (same numerals that you have chosen)

                    REMEMBER
                  Simple no ?

PREFERENCES Button return at MAIN SCREEN

Enjoy.

1.3 Remember

                  The numbers ALWAYS MUST BE DIFFERENT

```
            Rigth=0123      Wrong=0210

      However the computer to controls it before to play
```

1.4   Introduction

The NUMBERx game was originally clone Mastermind.
But I have wanted to do a few alterations.

Now you must guees a number and not the colors.
Choose number beetween 3 to 7 how to want it

My apologies for any bad english you might find :)

1.5   Installing

```
          The following files should be in the archive:

      Data/Banks
      NUMBERx.Guide
      Fonts/Siesta.font Theworks.font
      NUMBERx.exe
```

To install the game NUMBERx, do the following:

 – Copy Data drawer to your Drawer (Your Drawer)
 – Copy Fonts in your drawer fonts system

```
          IMPORTANT
```

1.6   Important!

```
            Assign NUMBERx: Your Drawer
```

1.7   Interface Commands

The interface commands buttons is it my routine.
No Bob No Icon No Resource Banks!

Nice eh ?
