Check out our
homepage
.

1.5 Who made this?

We did! Erm...

Code: Robert Kihl - Snarl-up Software
Graphics: Martin Gunnarsson - Snarl-up Software
Sound f/x: Ehhh.. If you can do better PLEASE contact
Snarl-up Software
NOW!

1.6 What can it do?

In Inept mode there is, except the usual Tetris blocks, a special block.
If you complete a row with one or more special blocks in something good, or bad, ↔
is gonna happen.

Special events:

Jukebox: Use the up arrow to pick a tune. There are 3 different tunes;
Rock 'n' roll, Slow rock and Metal.

Scorebandit: If you look at the score display, you'll see a lever, just

like the ones on slot machines.

PLUS that there are a bunch of things that doesn't need an explanation.

1.7 How to play this nice game.

Ineptris is like Tetris. Everybody knows how to play Tetris...don't they?

In game keys:

Up: Rotate block
Left: Move block left
Right: Move block right (wow)
Down: Increase speed down.

P: Toggle pause on/off.
Esc: Quit to main menu.

Menu controls:

Up/Down: Select item
Enter: Activate item

1.8 What you need.

You need:

AGA chipset
020 processor
2 meg chip-mem

In other words, an 1200/4000.

1.9 Your fault!

Don't blame us if your computer fucks up!

Hehe...
