

## AntiAlias

If you create a professional graphic, perhaps you would draw it three times the size you want it, and then reduce the size and gain smoothness! AntiAlias is a program that takes an image and reduces the "bumpiness" of normal graphics, without the hassle.

## MultiEye

This program is designed for developing and presenting multimedia presentations. Create your own presentations using text with transitions, pictures, buttons, audio and much more. To run efficiently, this program must be copied to your Hard Drive.

## ChecksQuick

Use your computer to organize and balance your checkbook. Enter the names, amounts and account numbers for all of your recurring bills. When it is time to pay bills, select the ones you need, put the checks into your printer, and click "Print." It's that easy. To run efficiently, this program must be copied to your Hard Drive.

## ColorFinder+

This is a great utility that generates color values. You can choose colors from its built-in 216 safe color palette, or anywhere else on your screen.

## FindText

Search the files on your hard disk for that specific text you know is hiding somewhere. Simply type in the text, specify which folder or disk to search, and it will find all files containing that text. Never lose another file again.
