This program requires Windows 3.0 or greater.

Description of the program

Swatm.exe - A fun game where you have to swat the various objects that appear on the screen. There are options for speed, number of objects, and kind of objects.

The easiest way to run this program is to copy everything on this disk into a subdirectory on your hard drive. Then from Windows you can run the program.

Technically Microsoft suggests that 'VBRUN300.DLL' be copied into your WINDOWS\SYSTEM subdirectory. This program require VBRUN300.DLL to be present either in the current subdirectory or in the WINDOWS/SYSTEM subdirectory.

Thank you for playing SwatM!
