

TaskTimer 96 v2.02

32 bit time management and tracking utility. Records, tracks, and summarizes time spent on tasks. Summary report can be filtered by Client and Date Range. Registered version includes *printed* report and full access to Client data. Easy to use. Thorough on-line help provided.

Future upgrades will feature multi-user capability with network server and workstation installation choices, as well as tracking tasks while the computer is off. (Save that laptop battery power!)

Can be uninstalled using Add/Remove Programs in Control Panel (**Note:** The file "TaskTime.gid" is created by the Windows Help engine and is not referenced in the uninstall log. Delete this file manually before uninstalling.)

Registration includes license for *TaskTimer 96* and *CalWin 96*, a 32 bit scheduler.

The following list of required files not included in this zipfile for faster downloading should already reside in your "Windows\System" folder prior to running "Setup.exe":

vb40032.dll
ven2232.olb
msvert20.dll
msvert40.dll
ctl3d32.dll
dao2532.tlb
msjt3032.dll
msjter32.dll
msjint32.dll
vbajet32.dll
vbdb32.DLL
mswng300.dll
odbcjt32.dll
odbcji32.dll
odbctl32.dll
vbar2232.dll

These files are already installed on your system if you have Visual Basic 4.0 - 32 bit loaded.

If you have any difficulty locating any of these files on-line, e-mail me directly at dfwells@msn.com and I will personally upload them. Check the Shareware Tools Library folder on MSN. I know at least some of them are there.
