Welcome to End of Time 2.0!

End of Time is a simple utility that gives the time, date, amount of free memory, and percentage of free resources. It will stay on top of other applications on the desktop so you can always know the time and the resources available. End of Time also has the benefit of letting you close it, exit Windows, exit & restart Windows or reboot your computer. New to version 2.0 is a configuration program that let's you change what is displayed, where End of Time is displayed, colors used, exit options, and whether or not it resides "on top."

*****CONTENTS*****

This file contains the following information:
Requirements
Installation
Using End of Time
Configuring End of Time
Registration

***** REQUIREMENTS *****

I wrote End of Time on a 486DX-33 with 4MB RAM, 534MB of hard disk space, and 800x600 resolution. But since the program is only 31KB itself, I don't think you'll have much to worry about. Windows 3.1 or above is required, however.

***** INSTALLATION *****

Please read the file *install.wri* or *install.txt.*

***** USING END OF TIME *****

Once loaded, there's nothing to do but glance at it when you want to know the time, date, or available resources. If, however, you would like to close End of Time or exit Windows in any of three ways, simply click once with the left mouse button anywhere on the End of Time display bar. A dialog box will appear with up to 6 buttons:

Configure	Start the Configuration program to set End of Time's parameters
About	A little information about End of Time
Close	Closes only End of Time
Exit	Exits Windows without further confirmation from you
Restart	Exits Windows, and then restarts it
Reboot	Exits Windows, and then reboots your computer

*****CONFIGURING END OF TIME *****

Please see the file *config.wri* or *config.txt.*

***** REGISTRATION *****

End of Time is SHAREWARE, not FREEWARE. Therefore, you are expected to register it with the author if you intend to use it beyond a 30-day trial period. I've provided an order form (order.wri or order.txt) for your convenience. At $10, I hope you'll agree that it's a good buy. Your

registration will get you a free copy of the next upgrade as well as my eternal gratification. I would appreciate any suggestions on how this product can be improved, even if you choose not to use it. I can be reached at CompuServe (71232, 1317) or by snail mail at Ken Barnes, PO Box 3911, Laramie, WY 82071.

Thanks again for trying out End of Time.
