

Install Instructions for Writer's Cramp

Copyright © 1994-1996 JRE Enterprises, All Rights Reserved

Writer's Cramp requires the following:

- 4+ meg memory (8 meg recommended)
- 2+ meg hard drive space
- Windows 3.1+ or Windows 95

Users of Writer's Cramp V2.0 or earlier:

Writer's Cramp V2.1+ changes the database structure used by Writer's Cramp V2.0 or earlier. V2.1+ will automatically modify any existing V2.0 or earlier database to the new structure. We **recommend** that you install V2.1+ into a different directory and **copy** the following files from your V2.0 or earlier directory to the V2.1+ directory: *.LDB, *.MDB, and *.INI files. After you have verified that the databases were converted correctly, you can delete the V2.0 or earlier directory.

To install Writer's Cramp, run SETUP.EXE.

If you are using a windows shell program other than Program Manager or Norton Desktop, you may have to manually create groups and group items for Writer's Cramp. If you have a previous release of Writer's Cramp installed, we recommend installing into a new directory. We recommend creating a group WRITER'S CRAMP. In group WRITER'S CRAMP, create four items:

1. Description = Writer's Cramp
Command Line = *path*\WRCRAMP.EXE
Working Directory = *path*
2. Description = Writer's Cramp Help
Command Line = *path*\WRCRAMP.HLP
Working Directory = *path*
3. Description = Writer's Cramp Database Maintenance
Command Line = *path*\WRMAINT.EXE
Working Directory = *path*
4. Description = Writer's Cramp Database Maintenance Help
Command Line = *path*\WRMAINT.HLP
Working Directory = *path*

KNOWN PROBLEMS:

GP fault occurs when run on a 286 machine. Problem is due to a bug in VBRUN300.DLL. You must use VBRUN300.DLL dated 5/12/93 or later to fix this problem.

An "Invalid File Format" error may occur when starting WRCRAMP.EXE and WRMAINT.EXE. Writer's Cramp ships will the following files, older versions of these files are incompatible with Visual Basic Version 3.0:

CMDIALOG.VBX	4-28-93
CSMETER.VBX	11-8-93
CSTEXT.VBX	3-10-94
HE_BMP.DIL	3-3-95
HE_GIF.DIL	3-3-95
HE_PCX.DIL	3-3-95
HE_TGA.DIL	3-3-95
HE_TIFF.DIL	3-3-95
2NDDLG.DLL	3-3-95
FMTIO.DLL	3-3-95
HEDLG.DLL	3-3-95
HEICON.DLL	3-3-95
HEIMGMAN.DLL	3-3-95
HERTF.DLL	3-3-95
HETOOLS.DLL	3-3-95
HEVB.VBX	3-3-95
HIGHEDIT.DLL	3-3-95
HIGHTBL.DLL	3-3-95
MHSPELL.VBX	4-20-95
MHTHES.VBX	5-5-95
MSABC200.DLL	4-5-94
MSAJT112.DLL	3-24-94
MSAJT200.DLL	11-20-94
THREED.VBX	4-28-93
TRUEGRID.VBX	5-5-94
VBDB300.DLL	3-24-94

These files are supposed to reside in the windows system directory. Other products may have installed these files in the windows directory or elsewhere. Scan all directories for these files and eliminate any occurrence of these files outside of the \WINDOWS\SYSTEM directory. Make sure the files in the WINDOWS\SYSTEM directory are the ones shipped with Writer's Cramp or NEWER. Visual Basic file formats were changed between Version 1.0, Version 2.0 and Version 3.0. This is NOT a problem with Writer's Cramp, but is an incompatibility between Visual Basic 1.0, Visual Basic 2.0 and Visual Basic 3.0 VBX files.
