Help for the Form Overlay Dialog

This is the help for the Form Overlay feature.
For help on other features please click on the help button which will be located on the dialog for that feature.

Table of Contents
For help on one of the dialog boxes used by the Form Overlay function, please click on the appropriate title from the list below.

Form Details

This screen allows the selection of a form. The description for the form is also displayed.

Form Selection

This dialog allows the selection of Form Data for Forms with no Form name. Data can be input as
? a data file name(*.EFP,*.EFC)
? a Form number selected from a Form ROM Module

The use of the Form ROM Module is possible under the conditions listed below:

@@¥On the Environment Settings screen, "Form ROM Module" has been selected
@@¥On the Basic Settings screen, the "Color" setting is set to "Black"

If there is a description saved with the Form, it will be displayed in the Description area.

If you click on the "Print Information" button, Form information stored in the ROM module will be printed.
