---------STAR WARS Theme for Windows 95----------
Rebel & Imperial versions 1.1

Thank you for having installed this wonderful theme for Windows 95 Plus!
We' ve worked a lot on this and we hope you will enjoy!

This theme was made by two boys who live in Italy and we' ve decided to write this README file and everything else in english because we want everyone (in Italy or not) to understand the contents of this theme. Please forgive us for our BAD english.

In this file we are going to explain everything about this theme such as where did we get the images from, our technical decisions, the Star Wars background... examinating every single file.

SOUNDS

Imperial Critical Stop: This is Vader that is killing an officer, because he failed!
Imperial Empty Bin: Vader is breathing...we've decided to put this sound because of the Recycle Bin's icon!
Imperial Question: Good job! Vader is impressed! It's very hard to impress him...
Imperial Maximize: A tie-fighter!
Imperial Asterisk: Somebody is using his Lightsaber!
Imperial Start Windows: Star Wars theme...a classic!
Imperial Program Error: The Death Star has been destroyed!!! Don't understimate the power of the Force...
Imperial New Mail Notification: This is the communication signal between space-ships. Mail is arriving!!!
Imperial Menu Popup: A very soft lightsaber sound for your everyday work.
Imperial Minimize: Another tie-fighter!
Imperial Restore up: A blaster!
Imperial Default Sound: Vader is awaiting orders...
Imperial Exit Windows: We've mixed Vader's voice with the imperial march! Good isn't it?

Rebel Critical Stop: Obi-Wan feels a great disturbance in the Force...I think you're in trouble!
Rebel Empty Bin: Oh no! Artoo is destroyed! Watch the icon...
Rebel Question: Vader has seen how good you are...and he invites you to join the Empire...Think about it!!!
Rebel Maximize: More reinforcements!!!
Rebel Asterisk: Chewie is getting angry!
Rebel Start Windows: Star Wars theme...a classic!
Rebel Program Error: You must believe it Luke, Vader is really your father!!!
Rebel New Mail Notification: This is the communication signal between space-ships. Mail is arriving!!!
Rebel Menu Popup: A very soft lightsaber sound for your everyday work.
Rebel Minimize: Reinforcements are arriving!
Rebel Restore up: An A-Wing is passing!
Rebel Default Sound: Remember that the force will be with you!
Rebel Exit Windows: We've mixed this too! We think that this music is very relaxing!

Well we've taken some of these sounds from the Internet, some from Lucasarts' games and other from the trilogy's video-cassettes...then we've mixed everything up!!!

IMAGES

Rebel Background: Three Tie-Fighters are chasing two X-Wings and...oh no!!! Red1 hit an asteroid !!!
Imperial Background: The Death Star, three Tie-fighters and a Star Destroyer...Quite frightening!!!
logo.sys: The main characters are here...can you see Palpatine in the bottom-left corner?
Rebel logow.sys: Prepairing for the jump into hyperspace!!!
Rebel logos.sys: Great! It works! See you at the rendez-vous point...and may the force be with you!
Imperial logow.sys: Initializing sequence...
Imperial logos.sys: ...BOOM!

All these images were made with 3D Studio. We've worked hard on these so...enjoy!
Can you see that little blue logo in every image? It's our logo...MicroXel Arts!!!
The best resolution for using these backgrounds is 800x600 32K, 64K or 16Mil. colours.

If you use a different resolution and these images don't satisfy you, e-mail us at the addresses given at the end of the README file, we will give you new backgrounds!

CURSORS

Imperial Normal Select: A normal red cursor
Imperial Help Select: Imperial droid is asking Leia!!!
Imperial Working in Background: The imperial logo!!!
Imperial Busy: Vader's lightsaber!
Imperial Precision Select: Vader has got Luke in range...I have you now! Very hard to do!!!!
Imperial Text Select: Imperial fonts.Very original I think.
Imperial Handwriting: Pens DO NOT exist in "Star Wars" so we've decided not to modify this icon.
Imperial Unavailable: A very normal non disponibile icon
Imperial Horizontal Resize: Normal red arrows
Imperial Vertical Resize: Normal red arrows
Imperial Diagonal Resize 1: Normal red arrows
Imperial Diagonal Resize 2: Normal red arrows
Imperial Move: Normal red arrows
Imperial Alternate Select: Normal red arrow

Rebel Normal Select: A normal green cursor
Rebel Help Select: The Rebel satellite is sending the secret plans of the Death Star for helpin' the Rebels!
Rebel Working in Background: The Rebel logo!!! It took a lot of time!
Rebel Busy: Luke's lightsaber!
Rebel Precision Select: Arm your torpedoes and make you attack run!
Rebel Text Select: This is OUR name (MicroXel Arts!!!). We wanted to put something of ours in this theme!
Rebel Handwriting: Pens DO NOT exist in "Star Wars" so we've decided not to modify this icon.
Rebel Unavailable: A very normal non disponibile icon
Rebel Horizontal Resize: Normal green arrows
Rebel Vertical Resize: Normal green arrows
Rebel Diagonal Resize 1: Normal green arrows
Rebel Diagonal Resize 2: Normal green arrows
Rebel Move: Normal green arrows
Rebel Alternate Select: Normal green arrow

ICONS

Rebel My Computer: The Millennium Falcon...prepare for the jump into hyperspace!!!
Rebel Recycle Bin full: R2D2 (Artoo Detoo)
Rebel Recycle Bin empty: Oh no! We've lost Artoo!
Rebel Risorse di rete: Wedge is arriving
Imperial My Computer: The Death Star...I think it is time we demonstrate the full power of this station!...
Imperial Recycle Bin full: Vader lent us his helmet...it has been a hard work but we did it!
Imperial Recycle Bin empty: See above!
Imperial Risorse di rete: Tarkin has something to tell you...

Try to use Plus' "show big icons" function! Our icons will be much better!!!

We didn't include any Screen Saver because we think that you should use "Star Wars Screen Entertainment" by LucasArts...

If you have any problems or you just want to tell us something please e-mail us at:
smarini@gol.grosseto.it
gdangelo@gol.grosseto.it
We will appreciate it very much!

A very special thank to George Lucas
