# Chapter 1

## Cookie

### 1.1 main

```
Name...:   Cookie
Version:   1.3
Date...:   11.11.95
```

---

```
Readme
      Important informations!
```

```
Using
      How to use Cookie..
```

```
Requirements
      System requirements..
```

```
Copyright
      Copyrights and disclaimer
```

```
History
      About program changes
```

```
Contact
      How to contact the author
```

### 1.2 readme

```
WHAT IS COOKIE ?
```

```
Cookie is a full system conform written database for "cookies"
```

---

how need in mailprograms. This is often much easier than write long lists of cookies.

Everybody who works and handles with cookies needs Cookie !

#### CARDWARE

Please note that Cookie is cardware. This means that everybody, who uses Cookie, has to send a postcard or an email to the author

.

#### CREDITS

I have to thank Reinold Sadlo for his good betatesting!

Have fun with Cookie !!

### 1.3 using

The using of Cookie is very simple, because it is an easy database and so only the button gadgets are described in this guide:

First

Prev

Add

Del

Next

Last

Flush

Load

Save

Print

About

Quit

### 1.4 rights

---

Cookie is copyrighted © 1995 by Constantin Rack.  
All rights are reserved. Unpaid copying only is allowed.

Cookie is cardware. This means you have to write a card to  
the

author  
(email is also possible), if you use it. By the  
way it is a good chance to send any comments or bugreports  
to the author.

It is forbidden to earn money with Cookie in any way !

Feel free to include Cookie in a software package, but do not  
forget to send a note to the  
author  
about it!

The

author  
cannot be held liable for the suitability or accuracy of this  
manual and/or the program(s) it describes. Any damage directly or  
indirectly caused by the use or misuse of this manual and/or the program  
it describes is the sole responsibility of the user her/him self.

## 1.5 system

Cookie should run on any Amiga system with OS 2.04 or higher,  
one disk drive and 512kb memory.

If there is any trouble running Cookie on your machine,  
please send

me  
a bug report, thank you !

## 1.6 add

By pressing the "Add" button (keyboard abbreviation: a) you  
adds an empty cookie to the actual cookie list.

The pre-defined text for a cookie such this is: "No cookie.".

Change the text by entering a new cookie in the text fields.

## 1.7 del

The "Del" button (keyboard abbreviation: d) deletes the actual  
cookie from the actual cookie list.

It is not possible to get the cookie back after deleting !

---

## 1.8 firstlast

By pressing the "First" button (keyboard abbreviation: f) or the "Last" button (keyboard abbreviation: l), Cookie jumps to the start or end of the actual cookie list.

## 1.9 prevnext

By pressing the "Prev" button (keyboard abbreviation: p) or the "Next" button (keyboard abbreviation: n), Cookie goes one cookie back or further.

## 1.10 flush

By pressing the "Flush" button (keyboard abbreviation: u) all cookies will be deleted from the actual list.

Make sure you really want to flush all cookies !  
It is not possible to get them back !

## 1.11 load

With the "Load" button (keyboard abbreviation: o) you can load any cookie databases. Please remember that the database will be appended to the actual list.

So it is recommended to flush all cookies from the actual list before loading a new database.

## 1.12 save

With the "Save" button (keyboard abbreviation: s) you can save the actual database to any file.

## 1.13 print

With the "Print" button (keyboard abbreviation: r) you can print the actual database.

## 1.14 about

By pressing the "About" button (keyboard abbreviation: b) you get some informations about the program and the author.

---

## 1.15 quit

With the "Quit" button (keyboard abbreviation: q) you quit Cookie. Remember that all cookies in the actual database will be lost !

## 1.16 format

A cookie data file has the following format:

```
<cookie>
<empty line>
<cookie>
<empty line>
<...>
```

A cookie can have max. 3 lines. It is not possible to do anything like this:

```
    This is a line...
```

```
    And another line...
```

if you want to let them one cookie!  
This example would cause two cookies!

I hope these are not so much format restrictions.

## 1.17 contact

If you want to contact the author and/or write him the card or email, because Cookie is cardware (!), send it to:

```
Constantin Rack
Steubenstr. 26a
D-58097 Hagen
Germany
```

```
Email:  racon@new.topnet.sub.de (Constantin Rack)
```

## 1.18 history

v1.0 (03.07.1995):

- First public release.

v1.1 (13.07.1995):

- Bugfix in load routine. One line cookies wasn't read

correctly. Fixed now.

- Bugfix in window. Some gadgets were cut by the window border. Fixed now.
- Version string included now.
- It is not more needed to press <enter> after changing a line of a cookie in order to set them for ever.

v1.2 (12.08.1995):

- Documentation rewrite for a better feeling reading it.
- Source code a little bit optimized.

v1.3 (11.11.1995):

- Improved many parts of program and documentation.
-
