Chapter 1

Virus Info Base

1.1   MessAngel Killer

```
Name          : MessAngel Killer

Aliases       : Eleni 3 Dropper

Type/Size     : Trojan/7100 unpacked, PP-Packed 1808 byte

Clones        : No Clones

Symptoms      : No Symptoms

Discovered    : 20-09-94

Way to infect: No Infection

Rating        : Less Dangerous

Kickstarts    : 2.X/3.X

Damage        : Installs the ELENI 3 virus

Manifestation: Pretends to be a Viruskiller!

Removal       : Delete File immediately.

Comments      : If  you're  starting the MessAngel trojan it gives out
                the following text:

                "MessAngel Killer by Docker of Twist!" ... etc.

                After that  it openes the startup-sequence and inserts
                at the beginning "B + [Return]".

                Then  the  virus  writes  the manipulated startup-seq.
                ALWAYS  with  5000 bytes no matter if the startup-seq.
                was longer or shorter.
```

After that a file will be written called "sys:B".
This file is 1504 byte long and is the "real" virus-
installer. The file contains the whole ELENI3-Boot-
block which will be activated on the next boot up!

On the screen you will get the following message:

MessAngel killer by Docker of Twist!
Checking startup-sequence...
VIRUS FOUND AND REMOVED!!!
Right to disable from memory!

Click on this gadget to see a Demo of the MessAngel
Killer virus. Push left mouse button to return.

-> For Eleni 3 Virus description see "ELENI 3".
