Comments      : The Superboy-Virus is a reprogramming of the SCA
                virus. It copies itself to $7EC00 and changes the
                Cool()- and DoIO()-Vector. The virus just infects
                a disk if you're booting with it. After 7 infections
                a ALERT-Message appeares:

                        "!!! ATTENTION !!!"
                "Some little beings, called bits and bytes"
                "Have reproduced themselves on your disks."
                "But do not worry, for it is only a..."

                        "VIRUS !!!"

                "This reproduction is another great deed of"
