

Looking for Star Trek fonts in MS-Windows TrueType format?

I have begun a search....

Since the Macintosh platform have Star Trek fonts, I have begun to convert those fonts over to TrueType format for use in the Microsoft Windows 3.1 environment. Assistance from other Mac users has been nearly non-existent ("Why ask why?") so I've decided to utilize some of my time, resources and money to get these fonts and convert them over to Windows.

Included in this .ZIP package is the Trek font, **CRILL1**.

CRILL1 I'll take partial credit (or blame) for. I originally downloaded this font from the DTP Roundtable on GEnie. It was in Adobe Type 1 format, known as Crillee. Using *FontMonger For Windows*, I converted it over to TrueType. It resembles the font used for the credits for *Star Trek: The Next Generation*.

Copy this file over to a subdirectory on your hard disk. Just to be on the safe side, create a fonts subdirectory so that you don't accidentally nuke any existing fonts. Refer to your Windows 3.1 manual on how to install additional TrueType fonts.

More fonts as I can get them from the Mac and DTP Roundtable.
