

PaperCut Quota - 6.1 - Print and Net Charging/Quota Software

By PaperCut Software Pty. Ltd. (www.papercut.biz)

BEFORE YOU CONTINUE...

You have downloaded PaperCut Quota. PaperCut is a print and Internet charging, quota and monitoring system for Windows networks.

PaperCut Quota may be installed in the following combinations :

- * Print charging only
- * Net charging only
- * Combined print and net charging

40-DAY EVALUATION

PaperCut Quota will fully function for 40-days. This software is not crippled or restricted.

I HAVE NOT READ THE USER GUIDE

We strongly recommend reading the user guide before continuing! Some manual setup tasks, such as configuring the "web tools" interface, are only detailed in the user guide.

REGISTRATION

A registration key to "unlock" this evaluation version for indefinite use can be purchased from <http://www.papercut.biz/>

WHAT IS A PRINT SERVER?

If you're unsure of what a Windows print server is, or how to configure one, then we recommend that you closely read the user guide. The Setup section will list the steps involved in configuring a network print server. You can find the User Guide at <http://www.papercut.biz/> .

WHAT IS A PROXY SERVER?

If you're unsure of what an Internet Proxy Server is, or how to configure one, then we recommend that you closely read the user guide. The 'Setup' section will list the steps involved in configuring a proxy server (i.e. Microsoft ISA Server) for use with PaperCut. You can find the User Guide at <http://www.papercut.biz/> .

UPGRADING FROM A PREVIOUS PAPER CUT RELEASE

Further information on the recommended upgrade process is available in the PaperCut FAQ located on the <http://www.papercut.biz/> website.

USER INQUIRY TOOL

An optional user inquiry tool can be installed on network workstation. This will display a user's credit status on login. PaperCut will automatically set-up a network share, PCSetup, containing the client software.

STANDALONE SYSTEMS & PEER-TO-PEER

PaperCut is designed for network servers, however it may be installed on a standalone system. When installing PaperCut on a standalone system or a small Peer-to-Peer network, select "Import user information from this computer." when prompted in the setup wizard.

WEB TOOLS

The optional web tools add-on requires either Internet Information Server (IIS). We strongly recommend taking the time to configure this feature after getting PaperCut up and running. The web tools interface allows users to use TopUp/PrePaid cards and other advanced features. Further information is available in the PaperCut user guide.

MORE INFO

More information about PaperCut can be found at our website: <http://www.papercut.biz/>

If you have any comments, or would like some technical help, please feel free to email us at: support@papercut.biz

DISTRIBUTION

This evaluation version may be distributed unchanged and in complete form by a 3rd Party.
