

INTRODUCTION

The rules of this game are very simple. Your task is to place five or more balls (in the same color) in one row, column or diagonally. Whenever you move the ball, three new balls appear from the top of the screen. If you complete five or more balls, the next three balls don't appear. The game is over, when there are no free locations for the next three balls.

How to move a ball? Click the mouse pointer on a ball. If you have sound card you will hear a sound. Then click on a free place in the grid. The ball will move. Do not try to drag & drop balls.

There are five levels. The level "1" is the easiest. The difference between the levels are in the number of ball-colors. The level is automatically changed whenever you reach 300, 1000, 2000 and 5000 points.

This game is originally based on the Russian DOS game called LINES. The difference is in the ball moving. In LINES you can't move the ball to another location if there isn't a free way to there.

Shortcuts: (N)ew, (L)oad, (S)ave, L(e)vel, S(o)und, (T)op 5, (H)elp, E(x)it.

KLING! OPTIONS

There are several options during playing.

- Whenever you press ESC a toolbar appears/disappears.
- If you click on a "New" button, a new game is started. Press Cancel if you change your mind. After that you will be prompted to enter your name/surname or nickname. If your score is better than the last best score, your name will be placed in the Top 5 Players.
- Use Load/Save to keep your games. If you are very tired or you are in hurry, click on the Save button. Enter the name for the file, and save it. After that you will be able to continue your game whenever you want by choosing Load. This game also allows to you to start a game without Load option. Just find the file with ".kli" extension and double-click it. The game will continue.
- Clicking on the "Level" button allows you to jump one level up. There is no way to jump one level down. So be careful !
- If you have sound card you can turn this option on. Whenever you click on the ball or complete five or more balls, a sound will be played. There is also a background music in MIDI format. If you have trouble with the sound, make sure that sound is off. Edit the file KLING.INI and change the line to
Music=0.
- See who are the Top 5 Players. Just click on a "Top 5" button.
- There is no need to explain "Help/Exit" buttons.

ORDERING

This game is FREEWARE!!! If you like this game send me a postcard to the following address:

Kliment Andreev
ul.Vich
