Introduction

Vault stores your information as an outline. Vault organizes your information into categories and sub-categories that you specify.

Vault's search command finds the information you need instantly. You can also browse the outline by expanding and collapsing items.

Vault's Send command allows you to send your notes to co-workers via electronic mail.

Vault's Dial Phone command automatically dials the phone number in the current outline item.

Vault's Print command allows you to specify which notes to print, and how they should appear. Vault's Print Preview command allows you to inspect the appearance of printouts before sending them to the printer.

Required Hardware and Software

Windows 95 or NT 3.51 or later running on a '386, '486, or Pentium computer. A 16-bit version for Windows 3.1 is also available.

Installing Vault

Run `SETUP.EXE` from Windows.

Running Vault

For information on running Vault, see Vault's on-line help.
