Don't "WAIT"…Upgrade today to the powerful "Set It and Forget It"® Diskeeper Server version

Now you can automatically eliminate fragmentation and improve your Windows NT system performance across your entire network.

"Set It and Forget It" Features

- **Automatically restores** and maintains Windows NT system speed and performance.

- **Remotely schedules**, monitors, and controls defragmentation across the network.

- Defragments **multiple disks** automatically while the system is in use. Transparent to end users.

- Time tested − **completely safe** with all types of disks.

- **Easy-to-use**, flexible scheduling options.   Five priority settings.

- **Directory file** consolidation and defragmentation.

- Group scheduling for groups of Windows NT systems − or even **entire domains** with just a few clicks.

- **Easy Analyze** − Allows administrators to quickly look at any disk on the network for fragmentation.

- **Network controls** (which are built into the Server version) can now be accessed by any authorized administrator from any Windows NT workstation.

- Schedule/defragment the **partitions on a disk** individually (useful feature for developers).

- **Explorer-like** interface screens.

- BackOffice compatible.   SMS installable.

- 30 day money-back guarantee.

- 90 days free technical support.

- 24-hour technical support available.

Exclusive Features

- Diskeeper can now move, consolidate, and defragment directory files and paging files!   Diskeeper's exclusive boot-time defragmentation feature is a major breakthrough in Windows NT disk performance technology.

- Group scheduling for single, hundreds, or thousands of disks or computers − with just a few mouse clicks!   You can even schedule an entire domain (or several domains) with just a few clicks.

- Diskeeper allows a default schedule to be defined, so that all disks can be set up quickly and easily.   This schedule can be fine-tuned as (and if) needed.

- Easy analyze feature allows administrators to quickly look at any disk on the system and evaluate fragmentation.   It also provides other essential disk information (size, free space, number of files, etc.).

- Easy access − Diskeeper's network controls (which are built into the Server version) can now be accessed from ANY workstation connected to the network.
