

Solutions

included library of file translators allows conversion in either direction between Wang OIS word processing documents and MacWrite, MacWrite II, Microsoft Word, Microsoft Works WP, and WordPerfect applications. Users can connect the Macintosh to the Wang or TC workstation using the included cable or modems (modems not included in the product). The Macintosh and Wang software included in the product allow the user to choose the types of files to be translated. Files maintain their original formatting, and are usable in their new environment. MacLink Plus/Wang OIS also allows connections to Wang PC's, as well as IBM PC's, compatibles, and laptops. The necessary PC software is included with the product.

Approximate Cost \$495
Supplier: DataViz Inc., 35 Corporate Dr., Trumbull, CT 06611, 203-268-0030

VSterm and VScom/Macintosh

VSterm from MacSoft and VScom/Macintosh from MH Group provide Wang 2110 terminal emulation for document transfer and conversion. With VSterm, any PC with a serial port can emulate the Wang 2100 or VT100 terminals, exchange documents and data with the Wang VS, and convert Wang VS data to PC formats. MacSoft also offers a program called Converset that provides file transfer and conversion through the Wang VSTC-IOP ports.

VScom/Macintosh provides Wang VS2110 terminal emulation, including quick screen response, support of Wang WP graphics and characters, and access to Wang function keys. The program also provides file transfer and conversion between Macintosh and Wang word-processing formats.

Approximate Cost \$195 to \$2495
Suppliers: MacSoft, 2920 F St., Bakersfield, CA 93301, 805-324-4291
 MH Group, 222 West Adams St., Chicago, IL 60606, 312-443-1222

MacBLAST for Asynchronous Communications

MacBLAST software interfaces with BLAST for the WANG VS/OS Revision 6.4 or later, equipped with TC IOP boards and asynchronous ports with ADC/EADC options. MacBLAST provides file transfer and text file format conversion for interfacing the Macintosh with Wang computer systems. MacBLAST transfers binary data, text, or graphics. MacBLAST and Wang VSBLAST can be utilized to create simple file transfer links or dial-up networks between Wang VS computers and any number of remote Macintosh or PC sites. MacBLAST features include: on-line help, automatic dialing and access to remote systems, and scripting for unattended Macintosh operations. BLAST runs over standard telephoned lines, X.25 networks, and satellite links. In addition, BLAST is resistant to line noise.

Approximate Cost \$195 to \$2195
