

## ***Overview***

---

The Apple® ImageWriter® II printer can enhance the quality of all your printed communications. It works with any Apple personal computer to create high-quality text and graphics in black or--with a color ribbon and appropriate software--in color. You can print up to 2 1/2 pages per minute (250 characters per second), or choose the “near-letter-quality” mode for documents with a professional look.

This is a printer that will grow with your needs. You can add the ImageWriter II Cut Sheet Feeder for effortless cut-sheet printing. And the LocalTalk® Option allows a group of users to share an ImageWriter II over the AppleTalk® network system.

For any application--from word processing and business graphics to accounting and artwork--you'll find the Apple ImageWriter II the right printer for your current and future needs.
