**************** MAJOR BUG FIX ****************************

There is a problem with the Mini-Mart processing the transactions through ABS. I have enclosed 2
files

  a) FIXMINI.EXE -   This program will fix all transactions that you have already taken and will
                allow the export program (CSSMM4.EXE) to re-transmit all your
                transactions.

To Run - Go to File | Run on program manager, and put in
FIXMINI.EXE C:\powrbbs\cssmmu.dat (or whatever drive you have powrbbs installed) then
run.   That is all there is to it. Now delete FIXMINI.EXE as you **MUST NOT USE IT AGAIN!!!!**

  b) CSSMM.DLL - Just place this in your Powrbbs directory and all new transactions will be
processed correctly!!!

Sorry for any inconvience!!!
