

Upgrade Now to the Automatic “Set It and Forget It”
Server version of Diskeeper 2.0.

Eliminate Disk Fragmentation to Improve Your Windows NT
Performance *Automatically*

SMS Installable so you can remotely install Diskeeper across your entire network. (Note: a separate license needs to be purchased for each Server and Workstation you plan to use Diskeeper on.)

Once installed, you can **remotely** inspect, schedule and execute defragmentation across your entire network.

Completely **automatic** defragmentation — just “Set It and Forget It.”

Full **scheduling** capabilities allow you to defragment when you like, and as often as you like — completely unattended by you or any user.

Fully **transparent** — it runs invisibly in the background while users get on with their work.

Completely **safe** — guaranteed not to corrupt or lose a file.

Compatible with all types of hard drives and processors running Windows

NT.

Dedicated, **high priority defragmentation** mode allows you to defragment any disk on a right-now basis.

Defragment an **unlimited** number of disks at one time.

30-days money-back **guarantee**.

90 days FREE technical **support**.

Reasonable price, **bulk purchase rates** available.

UPGRADE NOW TO THE
FIRST
AND MOST TECHNICALLY
ADVANCED
DEFRAGMENTER FOR WINDOWS NT.
