Upgrade <u>Now</u> to the Automatic "Set It and Forget It" Workstation version of Diskeeper 2.0.

Eliminate Disk Fragmentation to Improve Your Windows NT Performance *Automatically*

✔ Completely automatic — just "Set It and Forget It."

✔ Full **scheduling** capabilities allow you to defragment when you like, and as often as you like, completely unattended by you.

✔ Fully **transparent** — it runs invisibly in the background, using only idle resources, while you get on with your work.
✔ Completely **safe** — guaranteed not to corrupt or lose files.

✔ **Compatible** with all types of hard drives and processors running Windows NT.

✔ Dedicated, high-priority defragmentation mode allows you to defragment a disk on a right-now basis.

✔ Defragments multiple disks at one time.

✔ 30-day money-back guarantee.
