## Uncompressed

Select this option to convert the file without using any compression.

## Compressed

Select this option if the movie is a raw file or a compressed file that uses a non-IBM-compatible compressor. The converter will display a Settings button you can use to select the type of compressor you want.

## Direct Transfer

Select this option if the file is already compressed and the compressor is available on your MS-DOS computer. The converter will transfer the file frame by frame to the new file without using compression.
