Web Buddy®

Take Copies of Any Web Site to Browse Anywhere, Anytime. Instantly.

Mac™ OS

There is an enormous amount of information on the Internet. Some of it changes daily. Some of it "disappears" completely when you're not looking. Now there is a collection of utilities that will enable you to use, save and organize the information easily.

1. Accelerate your web browsing

Tired of visiting busy sites and waiting for the pages to appear? Take web sites down to your hard drive to view "off-line" with Web Buddy's Page to Go™ and Site to Go™ utilities.

Then, use your favorite browser to view the sites, just as if you were on-line. The only difference you'll see is how much faster the pages and graphics appear!
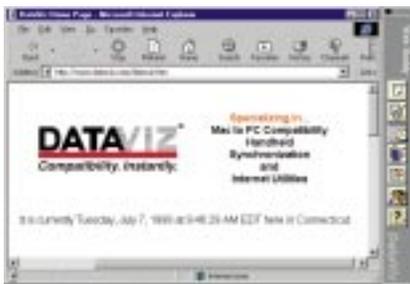

Web Buddy's unique Toolbar works alongside Netscape, Internet Explorer and other browsers to provide instant access to its powerful capabilities.

2. Share web pages with co-workers, students - or just friends

Why have an Internet connection for everyone in your company or classroom? Share the pages and sites that you have downloaded on a floppy disk, server or removable media, such as a Zip or Jaz disk. Now, anyone with a browser can view the pages without an Internet connection. This is a great reason why Web Buddy has been an extremely useful utility for schools that have only a few Internet connections but need to use the Internet for teaching in the classroom.

Furthermore, information on the web changes every second. Use Web Buddy's Page to Go utility as a research assistant to "capture" the data on web pages which may be gone tomorrow.

3. Take the web "on the road"

Download sites so you can view them at your convenience - on a plane, on the beach or in your living room. Once a page or site is taken "to go", there is no Internet connection needed to view it.

4. Not just an off-line browser...

Web Buddy also includes a variety of other utilities to enhance your web browsing experience.

Schedule: Let Web Buddy take your favorite pages and sites "to go", while you're busy doing other things (or when the web isn't so busy.)

Convert: Include web content in your own documents, such as an important research paper. Web Buddy will also retain the formatting of the original web page, so there is no need to retype. The convert feature supports the following formats:

Text Formats:	Graphic Formats:
• MS Word 5.x, 6.0	• GIF
• WordPerfect 3.x	• JPEG
• ClarisWorks 3.0, 4.0	• PICT
• MS Works 3.0, 4.0	• TIFF
• RTF and Text	

Bookmark: A powerful, but easy-to-use Bookmark utility which lets you go to, add and categorize your bookmarks on the fly. No need to deal with the complicated bookmarking of your web browser.

Organize: Use "Web Buddy Central" to easily store, categorize and retrieve all your important web pages, sites, graphics, bookmarks and more.
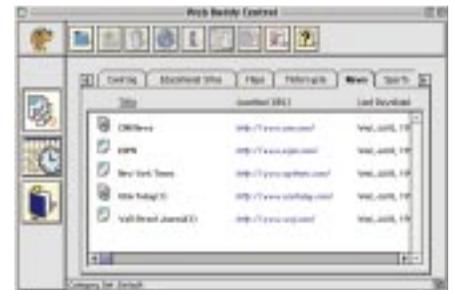

Web Buddy Central

"Web Buddy stands out from the crowd"
