DESKTOP PUBLSHING

All JPEG v1.0 FAT
by Paul C.H. Ho & Pink Elephant Technologies
Convert PICT files to Quick Time Photo©JPEGs quickly and
easily with this FAT Binary (accelerated for Power
Macintosh) application. To convert, just drag and drop a
PICT file and presto! it becomes a JPEG.

Clip Art
by Bright Ideas
Bright Ideas EPS Clip Art, a Software of the Month Club
exclusive! This folder contains original clip art from the talented
individuals of our Bright Ideas staff. These images are guaranteed to please!   This
month we have nine images — seven in EPS format, one color EPS and one TIFF. For
more information on Bright Ideas fonts and clip art, call our Member Services
Department.

ImageBrowser v1.2
by Albatross Productions
Fantastic! This update supports drag-and-drop and includes a preferences option.
Simply place a copy of ImageBrowser in a folder full of PICTs and double-click the
application. Sit back and enjoy a slide show of all the PICT files. You can even put them
in order using Lightable (see Disk One). This program is FAT (optimized for both 680X0
Macs and Power Macs). Application

LetterHeader v1.5
by Two Bits Worth
Incorporate custom letterheads into your documents with this
easy to use Control Panel. You can even fax documents with a
letter head from your Mac!

Lightable
by Nick Pausback
Create slide shows with PICT files — but that's not all! Lightable takes slide show
utilities to a higher level with its easy graphic interface. You can rearrange PICTs and
Lightable saves them with new names. This means you can view them with a slide
show utility (see ImageBrowser on Disk Two). Best of all, it's FAT (optimized for both
680X0 Macs and Power Macs). Application

Quark Xpress Training on CD Sampler
by Quay 2 Multimedia
We are happy to be able to present, by special arrangement,
this exclusive Quark Xpress tutorial. Quark Xpress Training
on CD utilizes Quicktime videos to show you in full color

how to get the most from Quark Xpress. This month's sampler
includes two Quicktime presentations: "01 Introduction"
shows how to run Quark and create a new document. "02
Demonstration" shows how to combine imported text and
graphics into a document with styled text and columns.

Fonts

CyberZombie
by Synstelien Design
Watch your back 'cause CyberZombie's back! We tried to kill
it! We tried to bury it, but it just keeps coming back to
haunt us! Use this cobweb©encrusted font when no clean©cut
font will do. Just don't use it when the moon is full!
TrueType and Type 1 font

CyberZombie
by Susan Townsend
DigitDog is modern with a cyberpunk attitude. Spice up contemporary documents with
this wild serif font. Font

by Attention Earthling (Jim Knoll)
The word "scrawl" comes to mind when you see this unusual sans serif font for the first
time. It's bold and messy — the kind of handwriting that gave your teachers fits! Font

by SUPERFREAK fONTS
Untamed and sloppy, this serif font has a "leaky fountain pen" look. Use it when straight-
arrow fonts like Times just won't do.

Lumberjack Boxed Lunch
by Synstelien Design
This rough©hewn font looks like it was carved from wood with
an axe. Looks best big and bold in headlines. But watch out
for the splinters.
