1.1 TomIcons5 Guide

```
Welcome!

  Tom's Magic WB Icons Number 5  ←

                                                 2-Jan-97

MagicWB2.0-Style Icons and other stuff in a 16 colour format.

Don't worry if these icons look a little strange at first. Just adjust your  ←
   preferences
to a  16 colour palette .

Please read on on how to make your workbench compatible with the colour prefs  ←
   used by many of
the world's greatest icon creators!

      ·     Not Another Set Of Magic WB Icons?!

```

1.2 The 16 Colour Palette

```
16 Colours on your Workbench

The 16 colours that I use on my Workbench are those from RomIcons9.

This is a direct quote from RomIcons9 RI.Guide about the installation of a  ←
   modified 16 colour
```

Workbench.

Take it away Roman.

"Steps to install my 16 colour palette on your system:

1. Change your screenmode to 16 colors.
2. Load the User-Startup into your editor and change the MagicWB-Daemon to:
     Run >NIL: C:MagicWB-Demon 4,123,123,123 5,175,175,175 6,170,144,124 ←
         7,255,169,151 8,0,0,255 9,50,50,50 10,96,128,96 11,226,209,119
12,255,212,203 13,122,96,72 14,210,210,210 15,229,93,93
3. Do the same with your Startup-Sequence
4. Load Prefs/Palette and change the last four colours to
          255,212,203   122,96,72   210,210,210   229,93,93
     and save it. After re-boot everything should work fine."

There you have it all the instructions you need to make your MWB2.0 look really ←
    Cool too!

1.3   Not Another Set Of Magic WB Icons |-O

Does The World Need Another Set Of Icons?

I think I answered this question in my last release. However, after the release ←
    of my latest
WB ScreenGrab (TomsWB.lha [Aminet:pix/wb]) I received quite a few e-mails ←
    wanting to know how
I did it and where they could get the icons to spruce up their Workbench. So I ←
    decided to
release another TomIcons which includes many of my new and revamped icons. If ←
    you like them
why not tell Me .

One e-mail that I did receive was from Olaf Groener. He initially wanted my Tool ←
     Manager
dock template and a few days later a bunch of Tool Manager docks in my style ←
    arrived in
the mail. They are included here in The Extra Bonus drawer and Olaf can be ←
    contacted at
the e-mail address shown below his drawer icon.

1.4   TomIcons4 Information

16 Colour Icons

Hi Everyone :-)!

Here is my fifth collection of MWB Icons and other stuff that I have drawn or ←
    created over the
last several months. Most of them require the modified 16 colour palette ←
    discussed in RomIcons9 .
 Click Here for further details.

I am not an artist but use a registered version of Iconian and Picticon to cut ↩
    and paste
images to produce the icons that are on your screen now. Once in a while ↩
    Personal Paint 6.3
came in handy as well ;-).

    Click Here for a brief look at my Workbench Screen.

As you can see I have abandoned the use of Tool Manager in favour of John ↩
    Corigliano's
StartMenu 2.0 TaskBar programme. I find it takes up less ChipRam to use and is ↩
    acceptably
quick enough for my needs. I have included some icons and brushes to compliment ↩
    this great
little programme. My settings for StartMenu are Here
            and Here .

1.5 Copyright

COPYRIGHT

  TomIcons is Copyright ©1996-1997 Tom Heeren .

This package is CARDWARE.

If you like any of these icons or the other stuff included in this package you
are humbly requested to spend a few minutes filling out a post-card of your home
town and sending it to me.

You are allowed to spread it all over the world using any storage medium
available, but you must spread the whole package intact. This includes CDROM
distributions. Programmers & creators of PD-software are allowed to include
single icons of this package in their own package-distributions (If you think
any of them are any good) *8-).

No one is allowed to take more than A$2.50 - (Australian Dollars) including
disk and copying cost, and you must include some other MagicWB icons/patterns
to fill up the disk by at least 90%.

MagicWB is Copyright ©1992-1994 Martin Huttenloher.
StartMenu is Copyright ©1996 John Corigliano.

1.6 How to reach me

Where does this guy live?

Tom Heeren
24 Herald Street

```
Cheltenham
Victoria   3192
Australia (Home of many Sheep, Border Collies and pig called Babe)!

Internet:<Tom Heeren>eagle@deakin.edu.au
```

If you send me Email, I will answer it as soon as I can :-).

```

1.7 Credits

```
Thanks must go to
```

- Martin Huttenloher for creating MagicWB and improving the look of the Amiga ←
    everywhere.
 - Thanks for including one of my ScreenShots on the MagicWB HomePage!

- Urban D. Müller for his work with the AmiNet.

- Roman "Icon King" Patzner for all his RomIcons (he’s up to 10 already!) and the ←
    postcard!

- All those people who have sent me a postcard from around the world. If you ←
    haven’t spent your
  dollar/mark/franc etc... why not do so now :-)

- John Corigliano for StartMenu. It’s a great little program, why not give it a ←
    go?

- All the other Icon artists out there who have given me the inspiration to ←
    produce
  this little collection.

– All those people who wrote to me about my other icon packages.
