Changer

1.1 DefaultTool-Changer.guide

```
                    "DefaultTool-Changer" (V1.0)

                            25.05.97

                Copyright (C) 1997 by Falk Zühlsdorff

                What is DefaultTool-Changer  ?
                Copyright

                Installation
                Using DefaultTool-Changer
                History
```

1.2 What is DefaultTool-Changer ?

DefaultTool-Changer is a simple/fast program to change the Default-Tools from
all icons (WBPROJECT) in a directory. It is helpful for CD-Productions or to
change the DefaultTools on your harddisk...

```
 Example: you have 100 pictures with 100 icons and many DefaultTools (in some
        directories with subdirectories...), like

            c:vt
            gfx:ppshow
            hd6:mainview
            c:multiview
            sys:Utilities/Multiview
            ...
```

and you need for you CD-Production

    `myCDROM:c/PicViewer`

or you want only one DefaultTool for all pictures on your harddisk, like

    Multiview

THEN YOU WILL LOVE THE PROGRAM: DefaultTool-Changer

1.3 DefaultTool-Changer/Copyright

DefaultTool-Changer is FREEWARE, (C) & (P) by

  Falk Zühlsdorff

  Please send my an email or postcard if you use this program.

  NO LIABILITY FOR DESTROYED DATA OR OTHER PROBLEMS USING THIS PROGRAM

  other stuff: CDpro (CD-Database),
                      APrint (Address-Database),
                      ...

                      P.U.R.I.T.Y.-Pascal-FD (63 Disx or on CD-ROM),
                      MODs Vol.1 (CD-ROM with more than 4000 MODs (Protracker))

 Reqtools.library is (c) by Nico François / Magnus Holmgren

1.4 DefaultTool-Changer/Installation

Two ways to install DefaultTool-Changer:

 1. Use the Installerscript "Install"...

 2. Copy "DefaultTool-Changer" to the place to want.

    If the "reqtools.library" is not in LIBS:
    copy DefaultTool-Changer/Libs/reqtools.library to LIBS:

1.5   DefaultTool-Changer/Using DefaultTool-Changer

Left part of the window:

 Listview "DefaultTools" displays a list with old and new DefaultTools

                          Format: old DefaultTool -> new DefaultTool

 Stringgadgets   left stringgadget: old DefaultTool
                          right stringgadget: enter your new DefaultTool

                          copy an entry: press RETURN/ENTER in the right
                                         stringgadget at the end of your input

 "N"   Activate the left stringgadget and you can enter a new ←
    entry

 "D"   If "D" is selected all entries you select in the ←
    Listview
                          "DefaultTools" will deleted...

Right part of the window:

 "Clear List"   Clear the list with old/new DefaultTools

 "Examine Directory"   Scans the selected directory and add all new ←
    DefaultTools to
                          the Listview "Default-Tools"on the right part of the ←
                             window.

 "Change DefaultTools"   Set the new DefaultTools for your selected directory.

                          If there is only an old DefaultTool and no new one the
                          DefaultTool from the icon(s) with this DefaultTool will
                          not changed.

 "Clean Up"   Deletes all entries with no new DefaultTool. You should
                          use this function before using "Change DefaultTools".
                          "Change DefaultTools" will be faster than witout "Clean ←
                             Up".

```
"Save List"                 Save the list with the old/new DefaultTools to the file ←
     you want.

"Load List"                 Load a list from selected file...

"Save Configuration"        Save window-size and window-position as tooltypes to  ←
     your program-icon

                            and the program starts with this values next time...

"Info"                      Requester with my address...
```

1.6 DefaultTool-Changer/History

```
V1.0   (25.05.97)           First release...

Future:  (perhaps)          - version using locale.library
                            - sort function

                            or other simple features, we will see

                          - version for p-OS (if p-OS becomes a surface with icons ←
                              :-)  !!!!!!)
```
