README.WRI Local Access Logon Module

Thank you for trying Local Access for Windows!

Last minute information...

Because the User's Manual is in Windows help format, all last minute information is added immediately to this Manual. Therefore you won't find any last minute info here...

You can open this manual by double-clicking on the User's Manual icon in the Local Access group.

Important: If you did not yet install Local Access Logon, please read the manual first! You can open the manual as follows:
1. Open File Manager
2. Select the directory or disk where the LA setup files are present.
3. Double-click on the file MANUAL.HLP
The hypertext manual MANUAL.HLP describes how you could install and uninstall Local Access Logon with the Setup program.
