

LATEST & GREATEST

BirthdayChecker 2.1

Make a wish

Keep track of important birthdays with this small, fast program. It reminds you of birthdays 1 to 30 days in advance.

- Enter dates in simple text
- Reminds you of birthdays when you start your computer
- Customize the reminder window's size
- Samples included

(Application by Benno Eberle)

Boom 1.0

Explosive game

This great-looking game is a cross between Bomberman and Doom. Destroy your enemies by placing bombs in their path. The faster you get it done, the more bonus points you earn. Can you master all 80 levels?

- Smooth animation in 256-colors
- Eight soundtracks and multi-channel sound effects
- Simultaneous two-player action
- Mid-game monsters

(Application by Federico Filippini)

CardinalGraph 1.0

Advanced math

This is a powerful, easy-to-use math and graphing program. Enter equations and solve for X using the calculator functions. You can also graph equations to find intersections of Y-plane, X-plane and more. Graph several functions simultaneously.

- Seven zoom methods
- Separate equation editor screen
- View equations in Cartesian, polar and parametric forms
- Print graphs

(Application by PUNCHINELLO Development; Requires 5MB of RAM)

ImageMapper 1.4.1

Linked images

Produce accurate image maps for your Web page. HTML formats include Client Side, CERN, NCSA and more. Display and convert between graphic files in a variety of formats, like JPEG, GIF, PICT, BMP, PPM and TARGA. Provides a set of tool bars similar to Adobe Photoshop's Selection and Path tools. Create links simply by defining the section on the image and naming the link.

- Samples included

- Separate small zoom window
(Application by Stuart Snaddon; Requires QuickTime)

IQ Test

You is smart

Rate your intelligence level with this realistic IQ test. You enter your age and the program asks questions.

- Timed test
- Detailed instructions and samples
- Sixty questions
- Result graph shows how you compare to others

(Application by Chris Athanas)

FEATURE PROGRAM

KeyBoom!

Letter attack

Defend cities in this Missile Command-style game with an educational twist. Instead of shooting bombs, you shoot letters.

- Records high scores
- Progressively difficult
- Higher levels have word targets
- Good graphics and funny sound effects

(Application by Michel de Messieres)

MicNotePad Lite 3.8.8

Can we quote you?

Transcribe documents, and record conversations and speeches with this great program. Ideal for interviews, lectures and meetings. Perfect for medical, legal, research and reporting jobs.

- Works in the background
- Multiple sound settings
- Sound file size shown while recording
- Customizable slow playback and skip back features

(Application by Nirvana Research; Requires sound input port or microphone; System 7.5 recommended for enhanced features)

Pattern Manager 1.0

Background organizer

Organize your pattern tiles with this handy program. Display patterns with their names in a customizable grid, install patterns into the system folder and set the utility's pattern.

This is useful for importing patterns from Pattern Manager into other desktop publishing programs.

- Supports drag 'n drop between files, Scrapbook, Finder and more
- Preview all patterns simultaneously
- Includes 38 great patterns

(Application by Sterling Augustine)

Ultimate Blackjack™ 1.2

Don't bust

Customize this comprehensive blackjack game! The simulations are complete and complex. It produces simple graphs and charts with detailed game information. Casino rules can be customized including when the dealer must draw, house betting limits, when you can double down and more.

- Hint options
 - Learn different strategies
- (Application by Matt Duggan)

URL Manager Pro

Web utility

Collect and organize Universal Resource Locators (URLs) in hierarchical structure with this handy program. Organize bookmarks between and within folders using drag 'n drop. URL Manager Pro integrates with Netscape Navigator and Explorer, adding an extra menu to these browsers.

- Combines all your Internet programs into one easy-to-navigate window set
- Comes with a sample URL set
- Remembers the last 1,000 Web pages you've visited

(Application by Alco Blom; Internet Config recommended)
