- Music and sound effects
- High scores list

(Application by Alex Metcalf, David Wareing and Ambrosia Software, Inc.)

Consult! 3.0

Exclusively for professional consultants

This is an all-in-one program written exclusively for independent consultants. Establish short and long term goals, track projects, keep a calendar and to-do list, take notes and organize your contact information. Accounting features include default chart of accounts, double-entry accounting, recurring transactions, check writing, billing, invoices and accounts receivables.

- 15 full-featured systems in one
- Examples included
- View cash flow, bank balances, account totals, credit card balances and profit/loss
- Daily Reminder screen shows status of all systems
- See data relationships between systems with Power Cross-Referencing

(Application by GURU! Software)

Diet Master 2.0

To your health

Log your food intake with this fitness program. List the food you've eaten and the program calculates the nutritional value, including calories, proteins, fats, carbohydrates, alcohol and more. Printed reports show dietary summary and a pie chart of consumed nutrients.

- Recommended Daily Allowance calculator
- Database of more than 5,000 foods
- Analyzes 19 nutrients

(HyperCard Stack by John Weinhofer, MS)
