Please Don't Pirate!

Please DON'T give a copy to your friend or neighbor, as this is pirating software. A ton of work goes into every detail of this program, many days without sleep, and more aspirans then you'd ever imagen. The cost of developing this and other programs are barley recovered through shareware fees (or software sales). Making copies of this software raises the cost to outtragious prices.

DFA is protected by federal copyright law. Making copies for any other reason other than for your own backup is a violation of this law.

Last of all: If you don't give away free copies, you'll feel better about yourself in the long run!

Customer Support

Being a customer, as you are, you are very important to us. We'd like to help you with any question about any problems. Don't forget many question are answered in the FAQ section of this manual.
