This program was conceived
by **Antoine ROSSET** (handle: Byakhee).

The text and graphics were made
by **Mike VENTURI** (handle: Cyborg)
and **John STILES** (handle: ÆON FLUX)

Thanks to **Jamal Hannah** for his support & beta-testing & mailing-list

Thanks to **Hubert Garrido** for his plugs!
(Source code available in PlayerPRO Developer Toolkit)

Thanks to **J.B. Wilson** for his new icons !

This program is a **Sound-Tracker** player.
It permits you to:
- Play music from MOD data files.
- Edit the instruments and partitions in MOD files.
- Save MOD files.

Player PRO is the best Sound-Tracker program on Mac!

It is also advised to use speakers and stereo to get maximum sound quality.

The Music drivers are **FREELY** available for programmers. They consist of a library pack in C format (MPW, CodeWarrior & Think).
The use and the incorporation of these routines in a program is also totally free, so take advantage of it!
Available everywhere !!

The author:

Antoine ROSSET: Born in 1972, student in human medicine at the University Hospital of Geneva in Switzerland and now a medical doctor! Fascinated since the age of 10 by Apple computers: Apple II+, Apple IIe, Apple IIgs, MAC IIcx, Quadra 700, PowerMac 8100 and now PowerMac 9600! I hope to buy a G4 in few months... Author of diverse shareware programs and games. Programmer in Digital Imaging Unit (University Hospital of Geneva), Consulting Programmer, specialized in Macintosh architecture. I'm working in Radiology and Imaging.

Are you working in an hospital? Do you know what "PACS" (Picture archiving and communication

system) is?! Here in the Geneva Hospital, we are developing many Macintosh software programs for PACS!

Osiris - Photoshop for medical imagery !!

Etc. Etc.
