Thank you for purchasing the PhotoDisc Sampler Version 6.4. It is our goal to deliver the finest photography available anywhere to our valued customers.

## BROWSE THROUGH OUR SAMPLER...

Sampler 6.4 includes an on-screen browsing utility called ImagePals 2™ (by U Lead) designed as a tool to guide you through PhotoDisc's library of images.

Sampler 6.4 is a 2-Disc set. The first disc is titled Sampler 6.4a. This disc is referred to as Disc "A" and includes images from Volumes 1-26. The second is titled 6.4b. This disc is referred to as Disc "B" and includes images from Signature Series 1-12, Object Series 1-12, Fine Arts Series 1-4 and 25 High Resolution images.

Disc "B" contains five separate browsing "Albums". The first album contains Volumes 1-12. The second album contains Volumes 13-21. The third album contains Volumes 22-26 and The Fine Art Series. The fourth album contains Object Series 1-12 and Signature Series 1-12. And finally, the fifth album contains 25 High Resolution images.

The five browsing albums (This represents the entire PhotoDisc Collection) exist on Disc "B". Disc "A" contains all but one album (Signature and Object Series) due to capacity constraints of the CD ROM. To peruse over 11,400 images simply activate the ImagePals 2 Browser by double clicking on the Browser2™:Browser.exe file located in the Sampler's directory within File Manager on **Sampler 6.4b**.

If you choose to browse the Albums on Disc "A", double clicking on any image contained from a Volume will enable you to view the image at full size. Insert Disc "B" if you choose to view any image contained from the Signature Series, Object Series or Fine Art Series at full size. Insert Disc "B" when you need to retrieve an image with numbers beginning with either SS, OS, or FA. And, Insert Disc "B" when you need to retrieve a high resolution image featured in the Hi Res Catalog.

ImagePals 2 offers Keyword Searching capabilities to narrow your searches. Begin your keyword search by selecting KEYWORD in the upper left corner of the menu bar and in the right space type in your descriptive word.

## AFTER PERUSING THE IMAGES...

Open your graphic design or page layout application.

Locate the desired image from either Disc "A" or Disc "B" and import the image from the Photos folder.

Adobe Photoshop™ or similar applications will be able to open the Sampler images. If you do not have access to a graphic design or page layout application that supports the JPEG file format a

decompression utility called Viewer.exe is provided on this CD. Viewer.exe can be found within the Browser2 folder located in the Sampler's directory within File Manager.

Please reference the quick start (QICKSTRT) file for detailed browsing and JPEG decompression instructions. Reference the keyword strategy (KEYSTRAT) for helpful information on performing the most effective keyword searching. QICKSTRT and KEYSTRAT as well as other helpful readme's are located in the Sampler's directory within File Manager.

#### HELPFUL INFORMATION FOR DISC "B"...

We have created the Sampler 6.4b disc to show you first-hand the quality and breadth of our Signature Series 1-12, Object Series 1-12 and Fine Arts Series 1-4 image library. After browsing through our image collection, if you are interested in obtaining a particular photograph, you may order the specific product it appears on. The first digit(s) represent the volume number and the last three digits represent the image number within that volume. For example: Signature Series 12 file names range from SS12001.JPG to SS12100.JPG. Object Series 2 file names range from OS02001.JPG to OS02100.JPG. Fine Art Series 3 file names range from FA03001.JPG to FA03100.JPG.

Sampler 6.4b includes low resolution JPEG COMPRESSED RGB TIFF files from PhotoDisc Signature Series 1-12, Object Series 1-12 and Fine Art Series 1-4. And, Sampler 6.4b also includes 25 high resolution JPEG COMPRESSED RGB TIFF files.

#### A TOUR OF SAMPLER 6.4b...

\*NOTE: New PhotoDisc products are released every month. Call PhotoDisc Customer Service at 1 800 528 3472 for product release date information.

**BROWSER 2 Folder** - This folder contains the IMAGE PALS browsing utility that allows you to preview all the images from Volumes 1-26, Signature Series 1-12, Object Series 1-12 and Fine Art Series 1-4. Run INSTALL.EXE in the root directory of the CD-ROM to install the Browser program to your hard drive. You may run the program directly from the CD-ROM by running BROWSER.EXE found in the BROWSER 2 folder. BROWSER 2 allows you to view the PhotoDisc images on your computer screen and search for specific criteria based on linked keyword files. For instructions on how to use IMAGE PALS Browser, please refer to the on-line help menu within the program.

**ULEAD2 Folder** - This folder contains resource files to be used by the Browser program and can be ignored by the end user.

**ALBUMS Folder** - Disc "B" contain five separate browsing "Albums". The first album contains Volumes 1-12. The second album contains Volumes 13-21. The third album contains Volumes 22-26 and The Fine Art Series. The fourth album contains Object Series 1-12 and Signature Series 1-12. The fifth album contains 25 High Resolution images.

**INFO Folder** - This folder includes:

GLOSSARY.WRI - This manual is a helpful reference for understanding some of the words and terms used on the PhotoDisc CD -ROM.

OUTPUT.WRI - This manual is a reference document for outputting images found on the PhotoDisc Sampler.

Q&A.WRI - This manual lists commonly asked questions and answers.

**ON LINE Folder** - This folder contains a PDF file with the latest information on accessing PhotoDisc products on line. These include our Homepage (<http://www.photodisc.com>) on the World Wide Web and The Microsoft Network. We are adding more and more images every week, so take a look at what's new!

**EUROPE Folder** - This folder contains brief information on our new office in England.

**TEXT Folder** - This folder includes four text-only documents for Volumes, Signature Series, Object Series and Fine Art Series. Information includes Filename, Title, Credits, Information and Keywords associated with the PhotoDisc images in Sampler 6.4.

CONCLUSION...

If there is anything else we can do to make our product more useful to you, we want to know. If for any reason you are not satisfied with our product, you may return it within 30 days of purchase for a full refund.

Please carefully review our end-user license agreement to ensure that your intended use complies with our usage guidelines. If you have any particular questions about usage please do not hesitate to call us for clarification.

We want our customers to USE our volume discs as easily and as often as possible, yet we need to protect the rights of our photographers.

Thank you for choosing PhotoDisc-The Leader in Digital Stock Photography.
