The Fine Art Series

A brushstroke of genius. Spectacular creations from the masters of European and American art, available for the very first time in a digital format. We scoured the world in search of the most useful images for digital design. Tour a magnificent collection assembled from such venerable showcases as the Louvre, the Uffizi Gallery, and the British Museum. Each image is given the respect it's due: we don't crop edges and the color is exactly as it looks in person. The result? A gallery of images so real you'll feel like you should stand behind red velvet ropes.

FA01

FA02

FA03

FA04

FA01 European Paintings

Leonardo da Vinci, Botticelli, Raphael, and many other masters of European art are represented in all their magnificence. We've taken great care to accurately drum scan and correct for any color migration. You'll see entire pieces-no cropping.

FA02 European Posters

You're likely to recognize illustrations used for the theater, fashions, beverages, the opera and many other temptations of the day by such artists as Toulouse-Lautrec. These colorful, bold designs from Europe, 1880-1920, have become icons in advertising.

FA03 Antique Maps and Heraldic Images

From the 1500's to the early 1800's come these incredibly detailed maps. Equally intricate are the heraldic images, adorned with shields, crowns, eagles, lions and interesting illustrated textures.

FA04 American Fine Art and Illustration

PhotoDisc scanned original turn-of-the-century watercolors, illustrations and etchings for this disc. They feature "modern" people, from well-to-do ladies in a Model T to pioneering trappers on horseback.
