1.2   description

Description :

~~~~~~

° If you have already experienced a write error on your HD

further to a cold reset or a switchoff, then ShutAll is

for you.

° Once executed, ShutAll will open its flashy window on the

workbench, or on a public screen.

° As a starter, it will inform you that all disk activities

have been stopped, enabling you to safely reset or switchoff

your computer.

° Now you have to face the ultimate question : shall I

reboot or cancel this critical action ? Choose wisely !

° An IFF sample, or ANY OTHER FORMAT included in your

sound datatypes list can be played.

° A collection of suitable samples has been included in

case of lack of inspiration. Try them, they are fun !

° ShutAll is a commodity that would enjoy living in your

WBStartup drawer, under a Dock or a ToolManager Icon.

° ShutAll does not use the shutdown.library.

° ShutAll is small but beautifull.

1.3   prerequis

ShutAll requires :

~~~~~~

° An Amiga working under KickStart 3.0 (V39) or better.

° MUI 3.3 (or better) to tune.

1.4   installation

Installation :

~~~~~~

° A self-explanatory install script is supplied.

° ShutAll and its icon can be placed anywhere.

° ShutAll Preferences as well.

° The samples and documentation can also be moved.

° Easy, isn't it ?

1.5   reglages

Tuning :

~~~~~~

° SA_Prefs is the configuration program for ShutAll.

° It's MUI graphic interface allow you build your sample list

° Use the right border gadgets to edit and modify it.

° Selection Mode gives you the choice between never play sam-

ple (NONE), play a different sample every time (SEQUENTIAL)

or choose a sample randomly in the list (RANDOM).

° The screen type (Worbench ou custom screen) can be set on

the second part of the window.

1.6   utilisation

Use :

~~~~~~

° ToolTypes list :

CX_POPKEY -> To call ShutAll if it is already

resident

CX_PRIORITY -> The commodity priority.

CX_POPUP -> Yes means that ShutAll will popup

upon call.

° ToolManager users (or any other similar program) users can

define a specific dock or icon for ShutAll.

° Once executed, ShutAll will display the following message :

Terminating all disk activity...

° All your devices will then be inhibited (floopy disks, hard

disk and others).

° The following message appears :

It's now safe to reset or switch off...

° If have you decided to switch off your computer,it's really

safe : all disk activities have been stopped.

° The Cancel button enables you to start over the disk

activity where it was stopped. You will return to Workbench

and Shutall will be hidden. It is still Alive ! (through

its Hotkey).

° The Reboot button enables you to reboot your computer. This

is especially usefull for Amiga 1200 tower users who can

not reset their computer using the keyboard.

° A small animation and a sample precede the rebooting.

° ShutAll can also be run from Shell.

1.7   copyrights

Copyrights :

~~~~~~

° ShutAll is an (E)MAILWARE which means that if you have

decided to regulary use it, you must (e)mail me !

° Your message can be posted under the old-fashionned way (

please send exotic postcards for my collection) or under the

new-flashy-oh_my_god_its_so_cool-cybernetic way via Internet

E-Mail.

° In both cases, my adresses can be found at the end of this

stupendous doc file.

ShutAll © Stéphane NICOLE in 1996

1.8   remerciements

Greetings :

~~~~~~

° Ian OConnor, for his program builder,

° Oli, official FCK member (see our homepage details bellow),

approved beta-tester, mountain biker and in-line skater.

° Nelson, certified beta-tester, and hard-disk killer during

his time-off...

° Mohic, supplier, official sponsor and beta-tester.
