The BEST map editor available for all you game/demo writers out there. Some of the features... Cut/copy/paste, multiple save/load formats, palette editor, highly configurable (Even includes a screen blanker), attribute control (Both local and global), multitasking, etc., and best of all, its a real dream to use.

This utility has been tested on most configurations, and works problem free. AGA support is currently limited to 64 colour screens.

A special version of GRIME featured on the coverdisk of the April 1996 Issue of Amiga Shopper.

Price - £4.99

What the reviewers say....

"GRIME is an easy-to-use map editor..."

"The interface is well thought out, meaning that getting to grips with operations is straightforward."

"GRIME could be the answer to many programmers' prayers."

Amiga Computing Febuary '95.

"Wow. AMOS programs are back with a vengeance this month."

"This is a really comprehensive piece of software."

"At £5, I think this is ideal for home games programmers."

1.8 Lottery Winner Pro

Lottery Winner Pro V3 - By Paul Morley

What can I say ? This is THE lottery prediction program. It features a great and easy to use interface, Hot/Cold number prediction, Wheel system (And Wheel editor) with future wheel disks coming soon, Zodiac prediction and a whole lot more (Including FULL technical support from the author).

This really is the dogs privates, and just to prove it one lucky user (Of an OLDER version) has recently won two grand ! The author himself has won seven times to date ! (How many times have you even won a tenner ?).

Price - £5.00

What the reviewers say....

"Another lottery predictor ? And they want a fiver for it ? Mind you, how

much do you spend on the lottery every week ? You might as well spend a little on some 'help'."

"This is a pretty extensive predictor with a variety of methods available..."

1.9 Smart CardZ

Smart CardZ - by Paul Morley

Don't have AGA ? Or you have AGA but no Hardisk ? I bet you've seen Klondike Deluxe AGA on a mates computer, or read a review ? Why oh why isn't there a version for you ?

Well as luck would have it, there is. And it's brilliant ! This uses converted Klondike cardsets (From 256-->16 colours) and looks really stunning.

There's not much really to say, if you want THE Klondike game for your computer then get this. (Please note, this is a MAJOR update from the PD version, CardZ, and we all know how good that is ! Also the PD version is no longer supported with cardsets, only this new version.)

Price - £3.99

What the reviewers say....

"All you non-AGA users need slobber and slaver over Klondike AGA card sets no more as Smart Cardz is here to save the day."

"Smart Cardz is a good, well-written program..."

Amiga Shopper October 1996 (Issue 67).

1.10 LightSpeed

LightSpeed - By Sublime Software

From the authors of the excellent 'Last Lap' comes THE Tron based game. This ISN'T yet another lightcycles clone, this introduces a totally new element to the genre (Tag !), and has a load more features, such as scrolling, split screen two player action, loads of levels and the great presentation that you'd expect from Sublime. Look out for this, you'll cream your pants !

Price - £4.99 (2 Disks, AGA Only)

1.13 Shoah Full Motion Video

Shoah Full Motion Video - By SHOAH

Shoah Full Motion Video (SFMV) is a new animation format for the Amiga. It is specifically designed for playing full screen animations. It uses larger than normal pixels thus allowing for a full screen display.

SFMV consists of a conversion program to convert your own IFF Animations into the SFMV format, and a high speed player for playing the SFMV animations back. Also included is an animation utility for reducing and adding effects to your animations, and a script generating program for the player. Full comprehensive documentation is provided and example animations.

1.18 Six Little Numbers

Six Little Numbers - By SHOAH

A very simple little program that generates six random numbers between 0 and 50. As you might have guessed it's for doing the national lottery (British one anyway).

1.19 GIF Examiner

GIF Examiner - By SHOAH

This is a simple little program. It displays the details of a GIF (Graphics Interchange Format) file, it doesn't display the picture, just the data. It just reads through the entire file and displays the contents of the blocks and sub-blocks.

1.20 Torque - Full Version
